

Mayor's Letter

I want to thank the community-at-large for the faith and trust in me they demonstrated on Election Day this past April 17th. I am the 11th Mayor in our short 48-year history as an Illinois municipal government and I have very large footsteps to follow in replacing former Mayor Ross Ferraro. So far, the transition from Village Trustee to Mayor has been rather smooth and I have devoted myself to learning and growing in my role as your Mayor.

For those who might not know me, I have been a Carol Stream resident and business owner for more than 30 years. In my personal life, I am the husband of my beautiful wife **Roberta** and proud father of 4 children, **Jennifer, Mark, Frank Jr.** and **Dominic**, the grandfather of 5 grandchildren. In my public life, I am the owner and Chief Executive Officer of Saverino & Associates, a food brokerage company that employs 30 professionals and does millions of dollars in food concessions sales to a large client base. I have held prior elected office as Commissioner and Past President of the Carol Stream Fire Protection District Board of Commissioners in the late 1980's and early 1990's.

One of the things I learned in serving as a Village Trustee these past 6 years is the favorable reputation our Village government has earned as an innovative and progressive Illinois local government. I have also come to understand that this reputation doesn't happen by accident but comes from the hard work and commitment of a dedicated staff of government professionals and an equally dedicated elected governing board willing to address and tackle the difficult challenges faced by our Village, some which are local, others regional and still others national in scope.

The Village's reputation was on full display on the evening of March 31st when a microburst ravaged the Covered Bridges Apartment complex and emergency response crews were called to respond to the injured and evacuate and relocate those whose units were damaged. With the assistance of both the Outreach Community Center, the DuPage County Office of Homeland Security and the American Red Cross, the Village's Crisis Management Team, the disaster scene was managed well and much needed shelters were opened and staffed so those most impacted by the disaster were immediately taken care of. There were countless volunteers and businesses that assisted in providing food, drinks, supplies and comfort to first responders and the victims of the disaster for days and weeks after the initial incident. While there are too many names to mention, please know that your efforts were instrumental in the ongoing recovery effort. I have never been more proud of the Carol Stream community for their compassion and willingness to help those in their time of need.

One of the actions taken by the Village Board and I that signaled the beginning of my administration is the adopting of the annual budget that occurred after the election but prior to my taking the formal oath of office. The recently adopted \$33 Million Budget is available for review at the Carol Stream Public Library and available for viewing and downloading from the Village's web page at [www.carolstream.org /Departments - Financial Management](http://www.carolstream.org/Departments-Financial-Management). The budget includes many projects that are essential to the successful operation of the Village and includes the review of the Comprehensive Land Use Plan and the Sign and Zoning Codes, the funding of a comprehensive intersection traffic control study, continued efforts toward Law Enforcement Accreditation, advanced planning toward the design and future construction of a much needed crime evidence storage facility, work toward compliance with the national requirement to equip our first responders (Police/Fire/EMS/Public Health) with interoperable communications for use in a disaster or a declared state of emergency, the construction of water service to those Wayne Township residents who have contaminated wells as well as the start and eventual completion of Phase II improvements to Fair Oaks Rd. These are only some of the countless goals the Village Board and staff has committed itself to tackling.

During my very 1st Village Board meeting, I was privileged to appoint **Mike Drager** as a Village Trustee to fill the remaining 2 years of my term as Trustee. I was also honored to reappoint long-time resident and public servant, **John Kauffman** as Chairman of the Board of Fire and Police Commissioners, and appoint as fellow Commissioners **Dominic Jeffrey** and **Ron Samson**. I want to wish Mike, John, Dominic and Ron much hard work and support in their efforts to serve the residents well in their official capacity as local public servants.

It has been a couple days since the closing of the 2007 'Summer in the Center' festival which was an overwhelming success. Event though severe weather kept us from opening the festival on Thursday, June 7th, the weather for the next 3 days couldn't have been better. All those who came out to our festival were treated to some of the best music, food and entertainment around. The efforts of Police, Public Works, the Village Manager and his staff and the staff of the Village's event planning firm, Onesti Entertainment all contributed to the most successful festival in our 9 years of event programming at the Ferraro Town Center.

In closing, thank you all again for your vote of confidence and offering me the privileging of being your Mayor for the next 4 years. I am anxious to meet, talk to many of you in the coming

Mayor's Letter

continued from page 1

months but being a part-time Mayor will require contact through e-mail or phone if we don't cross paths. I can be reached by phone and e-mail at: **(630) 871-6251** or fsaverino@carolstream.org

I look forward to seeing all of you at the 4th of July parade beginning at 10 am and summer concert and fireworks extravaganza at the Ferraro Town Center that evening.

Sincerely,

Frank Saverino Sr.
Mayor

Changing of the Guard

With the recent local elections this past April, several former members of the Village Board finished their terms of office namely Trustees Skip

Stubbs and long-time Trustee Tom Shanahan. Two current members were reelected with **Rick Gieser** reelected to a 4 year term on the Village Board and Frank Saverino Sr. elected as the Village's 11th Mayor. Three others residents are newly elected members of the Village Board and include **Mike Drager, Greg Schwarze** and **Don Weiss**. For a profile of the Mayor and the current members of the Village Board go on-line to: <http://www.carolstream.org/Government/LegislativeBoard.htm>

The Village has an elected Village Clerk whose mission it is to be the keeper of the official records which includes ordinances, agreements, contracts, resolutions, public records, meeting minutes, deeds, plats etc. On April 17th, Beth Melody, was elected as the new Village Clerk replacing long-time Village Clerk Janice Koster.

At the staff level, the long-time Police Officer and former Deputy Chief of Police Lance Oakland retired from the department after 26 years of distinguished public service. Deputy Chief Oakland was hired way back in 1981 and through dedication and hard work rose through the law enforcement ranks and was named Deputy Chief of the Police Department on January 20, 2003. In recent years, Deputy Chief Oakland was instrumental in advancing the Village's efforts to comply with national standards for emergency preparedness.

On June 18th, Lt. Kevin Orr was sworn in as the new Deputy Chief of Police. Kevin joined the Police Department back in 1988 and 10 years later was promoted to the rank of Sergeant and to Lieutenant in 2003. Kevin recently completed his Master Degree in Public Safety Administration and brings a wealth of experience and credentials to his new role as Deputy Chief.

Residents Making a Difference

On April 16th, the Village Board recognized by formal proclamation, Glenbard North seniors **Nicolette Augustyn** and **Ridda Siddqui** for receiving a 2007 Golden Apple Scholar award. Nicolette and Ridda are two of only 100 Illinois applicants to be given a 2007 Golden Scholar award. Both of these talented young ladies have plans to pursue a career in teaching and the award program was created in 1988 to identify and prepare bright and talented high school graduates who represent a rich ethnic diversity for successful teaching careers in high need schools throughout Illinois.

On May 14th, Mayor Saverino and the Village Board adopted Resolution 2265 recognizing the **Windy City Warriors Basketball Team** from (WDSRA) for winning the 2007 Illinois High School Association wheelchair basketball tournament this past March in Peoria. The resolution recognized WDSRA Exec. Director **Jane Hodgkinson**, Coach **Len Ciarlette** and players **Shawana Culp, Andrew Keubel, Elissa Robinson, Zach Haney, Tony Martin, Jonathan Ruiz, Danny Hernandez, Jenny Nilsen** and **Gina Wehling**.

On May 7th, former Village Treasurer **Anthony Manzullo** was sworn in as a newly appointed member of the Plan Commission and Zoning Board of Appeals. Anthony has been Treasurer for the past 2 years and brings with him a wealth of experience and knowledge of municipal government to the Commission which will serve him well in his new appointment.

Summer Blood Drive

The summer blood drive is scheduled for **Wed., August 22nd, from 2 – 7:30 p.m. at Heritage Presbyterian Church located at 965 N. Kuhn Rd.**

Residents and the general public can schedule individual appointments by phoning the Heartland Blood Center at (630) 892-7055.

Village Undertakes Surveying Project

The Village's Engineering Services Department is beginning what will be a multi-year project to survey all its underground utilities, namely storm sewers, water mains and sanitary sewers. Summer interns and college students hired by Northern Illinois University will perform this work. Most of the utilities are located on Village property. However, some utilities are located within rear yard easements. Therefore, residents may see individuals with photo identification badges working during routine business hours to locate these structures in a homeowner's rear yard. Do not be alarmed by their presence, but feel free to contact Engineering at (630) 871-6220 if you have questions.

This surveying work will be performed utilizing global positioning system (GPS) equipment. They locate a utility structure by holding a hand held device over the structure that acquires its position from orbiting satellites. These instruments are very sophisticated but actually quite easy to operate and save the Village time and money as opposed to locating the utilities by traditional methods.

Village's Community Standards for Building Improvements Upheld in Court

On April 25th, the Illinois Appellate Court for the 2nd Judicial District upheld the Village's action regarding a challenge to its enforcement of a community standard regarding occupying a dwelling unit for which unpermitted building improvements were made, writing that 'the Village met the burden of proof in the lawful administration and enforcement of its building codes'. The Municipal Code regarding the right of the Village to require a permit be secured for any planned building improvement prior to its construction and use is an essential community standard whose aim it is to protect current and future occupants of that building or structure from causing undue and unforeseen harm to occupants of the home or structure. Building codes and their enforcement also protect users of the improvement as well, and in addition protect those living adjacent to the subject property or improvement who may likely experience adverse impact from poor workmanship that is in direct violation of the requirements of that the building code provision(s).

During this legal proceeding, the local media wrote several articles portraying the Village as heavy-handed with respect to the enforcement of the applicable code provisions in this legal challenge. The fact of the matter is that the Village and its code enforcement staff as a matter of course always initiate a cooperative approach with residents and business owners who inherit unpermitted improvements with the purchase of a home or business. In the instance detailed above, the Village made numerous attempts to seek cooperation from the homeowner toward a fair and just solution to the code violations, but all attempts were all regretfully were rejected.

Nonetheless, the Village wants to reassure all residents and business owners found who find themselves in a similar situation to reach out to the Village for assistance as a matter of course, as you will find our code enforcement staff are indeed helpful and solution-oriented. While it is always best to secure a building permit prior to making any building or accessory improvements to their your property in an effort to ensure that your home or building is up to code, when unpermitted improvements are inherited, permits fees are typically waived to acknowledge the hardship, and technical expertise is offered so the code violation is abated in short order and the dwelling unit or business returns quickly to a safe condition. A uniform community standard with regards to building codes helps support the growing value of the Village's housing stock.

Road Maintenance Projects

One of the largest investments in the Village has are its streets, estimated at over \$100,000,000 in value. Preventative street maintenance costs only pennies per square yard while pavement resurfacing costs several dollars per square yard. For this reason, the Village has been very diligent in protecting this investment through an aggressive street maintenance program.

The most basic street maintenance service level is pavement rejuvenation. **Pavement rejuvenation** is similar to seal coating an asphalt driveway, except that you can drive on it almost immediately. Rejuvenator spray protects asphalt from drying out from the sun's harmful ultra-violet rays. Rejuvenator spray also seals small hairline cracks before they can enlarge while at the same time keeping the asphalt pliable. Pavement rejuvenation temporarily turns the road a brownish color for a few months before changing to a normal gray color.

Crackfilling is the second street maintenance service level. Once pavement surface begins to crack, it is essential that these cracks get sealed to keep water from getting into the base and advancing its deterioration. Freeze thaw cycles cause water under the pavement to turn to ice, which then expands, and then breaks the asphalt. In Illinois, each time a road is salted, it thaws. Crackfill material found to perform best is the fiber reinforced asphalt mixture. This high performance crackfill material is darker than aged pavement because it has not yet been exposed to the elements and when applied it creates a slight 1/8" bump in the pavement. Crackfilling is one of the most important programs used to extend the useful life of the pavement.

To determine if your street segment is scheduled for preventative maintenance, visit the Village web site at www.carolstream.org - **Departments & Services – Engineering – Construction Projects**. For more information on roadway maintenance, e-mail the Engineering Services Department at engineering@carolstream.org or call Bill Cleveland, Asst. Village Engineer @ (630) 871-6220.

New Illinois Law Allows Consumers to Place Freeze on Credit Report

As of January 1st, Illinois consumers can work with the 3 major credit report agencies – namely Equifax, Trans Union and Experian to place a freeze on your credit history, so potential creditors cannot access your credit history without your permission. Businesses do not, as a rule, open credit accounts without first checking a prospective consumer's credit history, and so, a security freeze is a powerful tool to protect yourselves from identity thieves. With a freeze on your credit report, even an imposter who has stolen your name and social security number will not be able to obtain your credit report.

To place a freeze on your credit report, you must submit a written request to each of the 3 credit bureaus with a check for \$10. For seniors and victims of identity theft, there is no charge to request a freeze on your credit history. From the receipt of your freeze request, the credit bureaus have 5 days to put the freeze into effect. Subsequent to the freeze, the credit bureaus will mail you a unique pin that only you can use when in the market for credit. Your PIN can be used to temporarily thaw your credit report when in the market for credit. If you know you will be applying for credit on a Saturday or Sunday, call the bureaus during the week to get the freeze temporarily lifted, so a credit report can be released to a specific creditor. Credit bureaus have up to 3 days to thaw a freeze once you authorize them to do so. It will cost an additional \$10 to lift or remove the freeze.

For information on this new consumer protection law, visit the Illinois Attorney General's web site at www.illinoisattorneygeneral.gov and click on the green 'Identity Theft Hotline' icon. You can also phone the Identity Theft Hotline at (866) 999-5630 or TYY (877) 844-5461.

Latex Paint Recycling Drop Off

Residents can drop off their unwanted latex paint during the designated 2007 summer collections listed above. The usable latex paint will be filtered and rebled into a variety of colors, types, and finishes. Residents, businesses, schools, churches, and community groups can obtain five gallon buckets of the quality-recycled paint for free during the week. The drop off facility is located at the DuPage County Wastewater Treatment Facility in Woodridge at 7900 S. Route 53. Drop of hours are as follows:

Monday through Friday from 8:00 a.m. to 2:00 p.m.
(July 1st – August 10th, excluding holidays)

Selected Saturdays from 8:00 a.m. to 2:00 p.m.
(July 14th, July 28th & August 4th)

For more information, contact the DuPage County Public Works Department at (630) 985-7400.

Vehicle Sticker Enforcement to Begin

Saturday, June 30th was the final day of the 60-day regular vehicle registration period. **Beginning Saturday, July 1st, all residents must display a 2007 vehicle license sticker on their motorized vehicle(s) on the lower right corner of the front windshield.** The sticker fee doubles for vehicle's registered after the June 30th deadline. The Police Department will begin ticketing vehicles that don't display a 2007 vehicle sticker. Residents and businesses that increase their vehicle fleets within the year are given 30 days to purchase a transfer vehicle sticker for a nominal fee. **The Village will honor a new resident's current vehicle sticker from their previous community until it officially expires.** For more information, phone the Village Receptionist at (630) 665-7050.

JULIE Has a New Phone Number

Simply Call 8-1-1

As part of its ongoing commitment to make safe digging as convenient as possible, JULIE, Inc. is announcing that it is now easier for homeowners and contractors to reach the one-call center by dialing 8-1-1. The 8-1-1 number is another option to reaching JULIE, **it does not replace** the existing toll-free number (800) 892-0123.

The Federal Communications Commission established 8-1-1 so people can call from anywhere in the country to have underground utility lines identified and marked before they begin their excavation project. Callers to 8-1-1 will be routed automatically to the appropriate 1-Call Center.

One easy phone call to 8-1-1 starts the process to get your underground utility lines marked for free. When you call 8-1-1 from anywhere in the country, your call will be routed to your local 1-Call Center. Local 1- Call operators will ask you for the location of your digging job and route your call to affected utility companies. Your utility companies will then send a professional locator to your location to mark your lines within a few days. Once your underground lines have been marked, you will know the approximate location of your utility lines and can dig safely.

Always call 8-1-1 before starting any digging project because knowing what's below protects you and your family.

File of Life

Attention Senior Citizens (persons aged 60 & over) and people with disabilities: The Carol Stream Police Department and Fire Protection District care about you! Call Carol Stream Police Department Social Services and ask for your free "File of Life." The "File of Life" is a medical information file you fill out and post on your refrigerator. District paramedics are trained to look for them when they respond to Carol Stream residences. The information you provide on the "File of Life" will assist the paramedics and doctors in providing you the best possible medical care quickly. Call 871-6280 Monday - Friday, between 9am and 5pm, to receive your "File of Life."

Honeylocust Plant Bug

The honeylocust plant bug is approximately 1/8 inch long when full-grown, pale to light green with a 4-segmented antennae and a beak-like mouthpart. The nymph is a miniature representation of the adult. Both stages are quite active and will fly when disturbed. The eggs are approximately 1/8 inch long and light in color.

Life History: The honeylocust plant bug over-winters as an egg. The eggs hatch just after the vegetative buds of the honeylocust begin to open. Young nymphs begin feeding with the most serious damage occurring at this time. Feeding by the nymphs causes a death of leaf cells particularly on the immature leaves. Nymphal development requires approximately 30 days with adults appearing by late May and early June. Eggs are laid by the adults in linear clusters under the bark of 2 and 3-year old twigs. The eggs then over-winter. There is one generation per year and the adults usually disappear by mid to late July.

Damage: Feeding by the honeylocust plant bug causes a death of leaf cells on immature growth resulting in severe leaf distortion, dwarfed leaflets, chlorosis, and yellow to brown spots. Irregular holes may result when dead or necrotic tissue falls out of affected leaves. Heavy plant bug populations may cause premature leaf drop, while light to moderately damaged foliage may persist throughout the growing season.

Management Strategies: At budbreak, branches can be shaken or jarred over a white piece of paper and new nymphs can be counted. They are small and are pale green and yellowish in color. Pesticides can be applied at this time if the numbers are high.

Treatment for the bug is rarely needed. Usually when damage is noticed, the plant bugs are too large to effectively treat. The leaves and branches of small trees may be sprayed with acephate, carbaryl, or malathion when the insects are young. The possible environmental impact does not justify spraying of large trees for these insects.

For information, visit the following web link www.entomology.wisc.edu/diaglab/03hilite/7_03.html

EMERALD ASH BORER ALERT CONTINUES

EAB was discovered near Detroit in 2002 and has since killed more than 20 million Ash trees in Michigan, Ohio, and Indiana. Now it has been identified in Cook and Kane County, Illinois.

The EAB has reached our area through firewood transported outside of infested areas. If you travel to Ohio, Indiana, or Michigan, it is illegal to take firewood out of these areas.

Remember that EAB only affects Ash Trees. The Village has removed Ash trees from its approved list of parkway trees. The Village will no longer plant Ash trees and asks residents not to plant Ash trees on their property. If the signs point to EAB, please contact Public Works at 630-871-6260 and a Public Works official will examine your tree. For more info, visit www.emeraldashborer.info

The Buzz on West Nile Virus (WNV) Infection Protection

Mosquito Bites - protecting yourself and family:

- **Sparingly apply insect repellent to exposed skin.** The more DEET a repellent contains the longer it will protect you from mosquito bites. Choose a repellent that provides protection for the amount of time that you will be outdoors.
- Avoid applying repellent to the hands of children;
- Be sure to read and follow the manufacturer's directions for use, as printed on the product.
- **Spray clothing with repellents** containing permethrin or DEET since mosquitoes may bite through thin clothing. Do not apply repellents containing permethrin directly to exposed skin.
- Whenever possible, **wear long-sleeved shirts and long pants outdoors.**
- **Place mosquito netting over infant carriers** when outdoors.
- **Stay indoors during peak biting times** - dawn, early evening & dusk.
- Install or repair window and door screens.

Breeding Sites - reduce their number around your house:

- **Twice a week, empty water from** flower pots, pet food and water dishes, birdbaths, swimming pool covers, buckets, barrels, and cans;
- **Check gutters for clogged down spouts;**
- **Remove discarded tires and other items that collect water.**
- **Check under your bushes, shed or deck for empty cans or bottles** that can collect water.
- Keep the length of your grass short.

Avoiding Exposure to Pesticide Spraying - those with upper respiratory or allergic conditions should follow take the following precautions to minimize possible exposure to pesticides:

- **Phone Clarke Mosquito Control Hotline at (800) 942-2555 for announcements about scheduled area spraying.** and remain indoors during applications in the immediate area.
- **Those with chemical sensitivities** or who feel spraying may aggravate a preexisting health condition, should consult their physician or local health department to inquire about special measures to avoid exposure.
- **When spraying is taking place in immediate area,** stay indoors, close windows and turn off window-unit air conditioners.

Reporting Dead Birds to the DuPage County Health Department - Dead birds may be a sign that West Nile virus is circulating between birds and the mosquitoes in the area. Remember that birds die from many other causes besides West Nile virus. **Dead crows and blue jays are important sentinels for detecting the West Nile Virus** and these dead birds will again be collected by the Health Department.

Persons with questions may contact the West Public Health Center in Wheaton at (630) 682-7560.

Nutrition & Physical Activity Key to Addressing Childhood Obesity

With school out for the summer, kids may likely be tempted to spend more time in front of television, computer and video screens than outside swimming at public pools or playing sports at area parks. Parenting by default plays a major factor in the childhood obesity problem, as many parents fail to insist their children participate in daily physical activity that helps maintain weight and cardio-vascular health. Childhood obesity is regrettably an epidemic in our country. The number of overweight children (includes adolescents) has doubled in the last 2 - 3 decades.

Obese children now have diseases like Type-2 Diabetes that used to only occur in adults. Overweight kids, if no nutrition and exercise intervention is introduced usually become overweight adults putting them at greater risk for limiting and debilitating conditions such as heart disease, high blood pressure and stroke. In addition to the medical issues is the devastating social discrimination that includes teasing, ridicule and a decreased social network that leads to low self-esteem and depression.

While it is clear that genetics plays a role in obesity, the main culprits remain eating too much and moving around too little. A family pediatrician is an important ally in addressing childhood obesity by calculating your child's body mass index (BMI) using height and weight in comparison with natural growth charting for children of that age and gender.

The National Heart, Lung, and Blood Institute (NHLBI) of the National Institutes of Health has teamed up with National Recreation and Parks Association (NRPA) to sponsor the nationwide **Hearts N' Parks program** that provides funding for park-sponsored activities for kids and adults that encourage healthy lifestyle choices. The goal is to reduce obesity by encouraging nutritious eating habits and regular physical non-competitive activity. Kids may go on field trips to local grocery stores and restaurants to learn how to make healthy selections and read food labels. They might participate in soccer, tennis, basketball, bowling, swimming, or hiking.

Positive modeling by a child's parents is crucial in addressing this nationwide epidemic. To this end, parents are implored to:

- **Help your children maintain a healthy body weight;**
- **Be supportive by showing acceptance, encouragement and love to your child.** Children know if they are overweight and don't need to be reminded or singled out;
- **Set guidelines for the amount of time your children can spend watching television or playing video games;**
- **Plan family activities that involve exercise** such as hiking, biking, wash the family car or a walk around the local shopping mall. Offer your children choices and then let them choose the activity;
- **Identify activities your children will enjoy** that aren't difficult or could cause embarrassment;
- **Eat meals together as a family** and eat at the table, not in front of a television. Eat slowly and enjoy the food;
- **Don't use food as a reward or punishment.** Children should not be placed on restrictive diets, unless done so by a doctor (for medical reasons). Children need food for growth, development and energy;
- **Involve your children in meal planning and grocery shopping.** This helps them learn and gives them a role in the decision-making;
- **Keep healthy snacks on hand.** Good options include fruits and vegetables; low-fat cheese, yogurt or ice cream; frozen fruit juice bars; and cookies such as fig bars, graham crackers, gingersnaps or vanilla wafers;
- **Focus on small, gradual changes in eating and activity patterns.**

This helps form habits that can last a lifetime.

17th Annual Back-to-School Fair

The 17th annual DuPage County Back-to-School Fair will be held at the DuPage County Fairgrounds in Wheaton on Wednesday, August 8th from 11 a.m. until 6 p.m. The Back-to-School Fair is a one-stop shopping event for health and human services for low-income families residing in DuPage County with school-aged children. The fair will offer the following free services:

Financial Assistance
School Physicals
Dental & Vision Screening
Child Development Activities
Educational Opportunities
Affordable Housing Info.
D.A.R.E. Program
School Supply Certificates
Legal Needs Assessment
Social Security Info.
Voter Registration
Job Referrals
Child Care Options
Nutrition Advice
School Safety Tips

Parents, you must bring this information to the Fair:

- **Proof of Income** (recent pay stubs, tax return or Public Aid card)
- If you can not provide this information, you must bring **cash income verification** (written letter from your employer, recent bank statements or a note from a case-worker)
- **Proof of address in DuPage County:** photo I.D., driver's license or State I.D., and a recent utility bill or lease
- **Identification for children:** birth certificate or medical card

For more information, phone Catholic Charities of DuPage County at (630) 495-8008.

School District 93 Hosts

New Student Registration

New student registration will be held on Wednesday, August 8th at 2 District 93 schools; namely Jay Stream Middle School and Stratford Middle School. Families with students who will attend Carol Stream, Western Trails, Heritage Lakes or Jay Stream Middle Schools should register at Jay Stream Middle School, 283 El Paso Lane in Carol Stream. Families with students who will attend Roy DeShane, Elsie Johnson, Cloverdale or Stratford Middle Schools will register at Stratford Middle School, 251 Butterfield Drive, Bloomingdale. Registration at both sites will take place from 7:30 a.m.- 2 p.m. and from 5-7 p.m. If you live within the district boundaries, please tell your new neighbors. For additional information, please call the District Office at (630) 893-9393.

Carol Stream Water Quality Report - 2006

The Safe Drinking Water Act Amendments of 1996 require that all community water systems provide information to their customers concerning the quality of their water. This report complies with this Act by providing information on the source of your drinking water, the results of water sampling, our compliance with drinking water regulations, as well as some brief educational material.

The Village of Carol Stream is committed to providing you with this information. If upon reading this report you should have any questions or wish additional information, you are encouraged to contact either Al Turner, the Director of Public Works, or Bob Hoffrage, the Water Division Supervisor and Chief Water System Operator at 871-6260. Copies of this Water Quality Report are available on the Village's web page at <http://www.carolstream.org>. Additionally, you are always welcome at the regularly scheduled Village Board Meetings that hold an informal Listening Post at approximately 7:30 p.m., prior to the 8:00 p.m. Board Meeting scheduled for every first and third Monday of the month.

The Village of Carol Stream receives Lake Michigan Water that is processed by the City of Chicago at the Jardine Water Filtration Facility, which is the largest purification plant in the world. The Jardine Water Treatment Facility is just north of Navy Pier on the Chicago lakefront. Lake Michigan is the source of water used to provide drinking water for Chicago and many suburban communities, including Carol Stream. For more information, contact their web page at <http://www.ci.chi.il.us/Water>. The Village of Carol Stream is a customer of the DuPage Water Commission who purchases the water from the City of Chicago and transports it to the member communities. Water is metered and then pumped into our distribution system and into the elevated and ground storage facilities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the USEPA's Safe Drinking Water Hotline (1-800-426-4791).

Lake Michigan as one of the Great Lakes is an excellent source of drinking water. However, all sources, including lakes, rivers and wells have a possibility of contamination, including contamination such as:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife;
- Inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining or farming;
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff and residential uses;
- Organic chemical contaminant, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff and septic systems;
- Radioactive contaminants, which may be naturally occurring or be the result of oil and gas production and mining activities.

Source Water Assessment

The Illinois EPA considers all surface water sources of community water supply to be susceptible to potential pollution problems. The very nature of surface water allows contaminants to migrate into the intake with no protection only dilution. This is the reason for manda-

tory treatment for all surface water supplies in Illinois. Chicago's offshore intakes are located at a distance that shoreline impacts are not usually considered a factor on water quality. At certain times of the year, however, the potential for contamination exists due to wet-weather flows and river reversals. In addition, the placement of the crib structures may serve to attract waterfowl gulls and terns that frequent the Great Lakes area, thereby concentrating fecal deposits at the intake and thus compromising the source water quality. Conversely, the shore intakes are highly susceptible to storm water runoff, marinas and shoreline point sources due to the influx of groundwater to the lake. Throughout history, there have been extraordinary steps taken to assure a safe source of drinking water in the Chicagoland area. From the building of the offshore cribs and the introduction of interceptor sewers to the lock-and-dam system of Chicago's waterways and the city's Lakefront Zoning Ordinance. The city now looks to the recently created Department of Water Management, Department of Environment and the MWRDGC to assure the safety of the city's water supply. Also, water supply officials from Chicago are active members of the West Shore Water Producers Association. Coordination of water quality situations (i.e., spills, tanker leaks, exotic species, etc) and general lake conditions are frequently discussed during the association's quarterly meetings. Also, Lake Michigan has a variety of organizations and associations that are currently working to either maintain or improve water quality. Finally, one of the best ways to ensure a safe source of drinking water is to develop a program designed to protect the source water against potential contamination on the local level. Since the predominant land use within Illinois' boundary of Lake Michigan watershed is urban, a majority of the watershed protection activities in this document are aimed at this purpose. Citizens should be aware that everyday activities in an urban setting might have a negative impact on their source water. Efforts should be made to improve awareness of storm water drains and their direct link to the lake within the identified local source water area. A proven best management practice (BMP) for this purpose has been the identification and stenciling of storm water drains within a watershed. Stenciling along with an educational component is necessary to keep the lake a safe and reliable source of drinking water.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. USEPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbial contaminants are available from the USEPA's Safe Drinking Water Hotline (1-800-426-4791).

In order to ensure that our water is safe to drink, the USEPA prescribes regulations that limits the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water, which must provide the same protection for public health.

Attached are several tables indicating the constituents that are regulated for which the Chicago/Carol Stream drinking water has been tested. The data is separated into data as tested by the City of Chicago as the parent supply of our drinking water and the Village of Carol Stream as the satellite supplier.

Neither the City of Chicago nor the Village of Carol Stream had any water quality violations during 2006

Carol Stream Water Quality Report - 2006

Regulated Contaminants Detected in 2006 (collected in 2006 unless noted)

Lead and Copper

Date Sampled: 12/31/2005

Definitions:

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Action Level Goal (ALG): The level of a contaminant in drinking water below which there is no known or expected risk to health. ALG's allow for a margin of safety.

Lead MCLG	Lead Action Level (AL)	Lead 90th Percentile	# Sites Over Lead AL	Copper MCLG	Copper Action Level (AL)	Copper 90th Percentile	# Sites Over Copper AL	Likely Source of Contamination	
0	15 ppb	<5 ppb	0	1.3 ppm	1.3 ppm	<0.100 ppm	0	Corrosion of household plumbing systems; Erosion of natural deposits	Edit

Water Quality Test Results

Definitions: The following tables contain scientific terms and measures, some of which may require explanation. Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCL's are set as close to the Maximum Contaminant Level Goal as feasible using the best available treatment technology. Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLG's allow for a margin of safety. mg/l: milligrams per litre or parts per million - or one ounce in 7,350 gallons of water. ug/l: micrograms per litre or parts per billion - or one ounce in 7,350,000 gallons of water. na: not applicable. Avg: Regulatory compliance with some MCLs are based on running annual average of monthly samples. Maximum Residual Disinfectant Level (MRDL): The highest level of disinfectant allowed in drinking water. Maximum Residual Disinfectant Level Goal (MRDLG): The level of disinfectant in drinking water below which there is no known or expected risk to health. MRDLG's allow for a margin of safety.

Regulated Contaminants

Disinfectants & Disinfection By-Products	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source Of Contaminant	
TTHMs [Total Trihalomethanes]	10/18/2006	39.8	13.6 - 39.8	N/A	80	ppb	No	By-product of drinking water chlorination	Edit
Total Haloacetic Acids (HAA5)	4/17/2006	11.5	9.1 - 11.5	N/A	60	ppb	No	By-product of drinking water chlorination	Edit
Chlorine	12/31/2006	0.4816	0.4672 - 0.4816	MRDLG=4	MRDL=4	ppm		Water additive used to control microbes	Edit

Note: The state requires monitoring of certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. Therefore, some of this data may be more than one year old.

Carol Stream Water Quality Report - 2006

-Definition of Terms-

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Level Found: This column represents an average of sample result data collected during the CCR calendar year. In some cases, it may represent a single sample if only one sample was collected.

Range of Detections: This column represents a range of individual sample results, from lowest to highest that were collected during the CCR calendar year.

Date of Sample: If a date appears in this column, the Illinois EPA requires monitoring for this contaminant less than once per year because the concentrations do not frequently change. If no date appears in the column, monitoring for this contaminant was conducted during the Consumer Confidence Report calendar year.

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

nd: Not detectable at testing limits.

n/a: Not applicable

Detected Contaminants

Contaminant (unit of measurement) Typical Source of Contaminant	MCLG	MCL	Highest Level Detected	Range of Detections	Violation	Date of Sample
--	------	-----	------------------------	---------------------	-----------	----------------

Microbial Contaminants

TOTAL COLIFORM Bacteria (% pos/mo)
Human and animal fecal waste. 0 5% 0.7% in Aug. (4 out of 572 samples) n/a

FECAL COLIFORM AND E. COLI (# pos/mo)
Human and animal fecal waste. 0 0 2 (Fecal Coli) in Sept. (2 out of 498 samples) n/a

TURBIDITY (%<0.3 NTU)
Soil runoff. Lowest monthly percent meeting limit. n/a TT/95% 100.000% n/a

TURBIDITY (NTU)
Soil runoff. Highest single measurement. n/a TT=1NTUmax 0.15 n/a

Inorganic Contaminants

BARIUM (ppm)
Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits. 2 2 0.020 0.020 - 0.020

NITRATE (AS NITROGEN) (ppm)
Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits. 10 10 0.34 0.30 - 0.34

NITRATE & NITRITE (ppm)
Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits. 10 10 0.35 0.30 - 0.35

Disinfectants/Disinfection By-Products

TTHMs [TOTAL TRIHALOMETHANES] (ppb)
By-product of drinking water disinfection. n/a 80 16.0* 9.40 - 20.8

HAA5 [HALOACETIC ACIDS] (ppb)
By-product of drinking water disinfection n/a 60 8.88* 6.70 - 11.3

CHLORINE (as Cl2) (ppm) Drinking water disinfectant 4.0 4.0 0.664 0.638 - 0.664

TOC [TOTAL ORGANIC CARBON]
The percentage of Total Organic Carbon (TOC) removal was measured each month and the system met all TOC removal requirements set by IEPA

Contaminant (unit of measurement) Typical Source of Contaminant	MCLG	MCL	Highest Level Detected	Range of Detections	Violation	Date of Sample
--	------	-----	------------------------	---------------------	-----------	----------------

Unregulated Contaminants

SULFATE (ppm)
Erosion of naturally occurring deposits. n/a n/a 28.1 27.2 - 28.1

Carol Stream Water Quality Report - 2006

State Regulated Contaminants

FLUORIDE (ppm) Water additive which promotes strong teeth.	4	4	0.98	0.89 – 0.98
SODIUM (ppm) Erosion of naturally occurring deposits; Used as water softener.	n/a	n/a	6.80	6.70 – 6.80

Radioactive Contaminants

BETA/PHOTON EMITTERS (pCi/l) 11/05/2001 Decay of natural and man-made deposits.	0	50	2.000	nd – 2.000
---	---	----	-------	------------

Unit of Measurement

ppm - Parts per million, or milligrams per liter
 ppb - Parts per billion, or micrograms per liter
 NTU - Nephelometric Turbidity Unit, used to measure cloudiness in drinking water
 %<0.5 NTU - Percent samples less than 0.5 NTU
 pCi/l - Picocuries per liter, used to measure radioactivity

Water Quality Data Table Footnotes

TURBIDITY - Turbidity is a measure of the cloudiness of the water. We monitor it because it is a good indicator of water quality and the effectiveness of our filtration system and disinfectants.

UNREGULATED CONTAMINANTS - A maximum contaminant level (MCL) for this contaminant has not been established by either state or federal regulations, nor has mandatory health effects language. The purpose for monitoring this contaminant is to assist USEPA in determining the occurrence of unregulated contaminants in drinking water, and whether future regulation is warranted.

FLUORIDE - Fluoride is added to the water supply to help promote strong teeth. The Illinois Department of Public Health recommends an optimal fluoride range of 0.9 mg/l to 1.2 mg/l.

SODIUM - There is not a state or federal MCL for sodium. Monitoring is required to provide information to consumers and health officials that are concerned about sodium intake due to dietary precautions. If you are on a sodium-restricted diet, you should consult a physician about this level of sodium in the water.

* Highest Running Average computed quarterly

2006 Non-regulated Contaminant Detections

The following table identifies contaminants detected within the past five years. State and federal regulations do not require monitoring for these contaminants and no maximum contaminant level (MCL) has been established. These detections are for informational purposes only. No mandated health effects language exists. The CCR Rule does not require that this information be reported; however, it may be useful when evaluating possible sources of contamination or characterizing overall water quality.

-Definition of Terms-

Level Found: This column represents an average of sample result data collected during the CCR calendar year. In some cases, it may represent a single sample if only one sample was collected.

Range of Detections: This column represents a range of individual sample results, from lowest to highest that were collected during the CCR calendar year.

Date of Sample: If a date appears in this column, the Illinois EPA requires monitoring for this contaminant less than once per year because the concentrations do not frequently change. If no date appears in the column, monitoring for this contaminant was conducted during the CCR calendar year.

<i>Contaminant (unit of measurement) Typical Source of Contaminant</i>	<i>Highest Level Detected</i>	<i>Range of Detections</i>	<i>Date of Sample</i>
--	-----------------------------------	--------------------------------	---------------------------

Additional Contaminants

BORON (ppb)	18.0	14.0 – 18.0	Jan. 10, 2006
--------------------	------	-------------	---------------

Erosion of naturally occurring deposits; Used in detergents and as a water softener; Used in production of glass, cosmetics, pesticides, fire retardants, and for leather tanning.

Unit of Measurement - Definition

ppb - Parts per billion, or micrograms per liter

2006 Violation Summary Table

<i>Violation Description</i>	<i>Start</i>	<i>End</i>
------------------------------	--------------	------------

No drinking water quality violations were recorded during 2006

2007 Sponsor & Donor Honor Roll

The Village would like to thank its many sponsors for their generous support of 2007 Town Center events and Village-sponsored community cleanup events. Your partnership support allows our community to thrive.

20th Annual Independence Day Parade

The local Parade Committee invites the community to join them in celebrating our democratic freedoms by attending the 20th Annual Independence Day Parade on Wednesday, July 4th scheduled to kick off at 10 a.m. from Lies Rd. @ County Farm Rd. The parade's theme is 'Carol Stream MVP's (Most Valuable People) and will feature entertainment for all age groups and include musical floats, clowns, balloons, and give-aways for children in attendance. The parade route is as follows:

2007 Parade Committee members extend their personal thanks to all those who donated their time, hard work and financial resources to make this annual event a community tradition. If you have any questions about this year's event or would like to become a member of next year's planning committee, contact **Kim Gieser at (630) 681-7562** or **Linda McCarthy at (630) 588-0205**.

July 4th Celebration

Gather at the Town Center with family, friends and neighbors to celebrate our American freedoms on the evening of Wed., July 4th. Beginning at 7 p.m., **Tin Horse**, one of Chicagoland's most sought after country rock bands will take the Town Center stage for a 2-hour concert performance. Starting at 6 p.m., **Lou Malnati's Pizza** will be serving up some of their award-winning pizza and snack food to those in attendance. A fireworks extravaganza at the Town Center will begin at dusk. Shuttle Bus service to the Town Center from remote parking lots in the industrial park along Lies Rd. will be provided from 6 - 11 p.m. For more information, call 665-7050. Shuttle bus service to the Town Center from designated remote parking lots on Lies Rd. east of Gary Ave. will begin at 6 p.m. and continue until 11 p.m.

Attend the 24th Annual National Night Out Celebration in Community Park

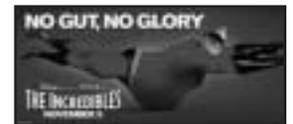

On Tuesday, August 7th, the National Association of Town Watch and the Village's Police Department invites residents to join with communities nationwide to participate in the 24th annual National Night Out Against Crime and Drugs. Residents are encouraged to lock their doors, turn on their home's exterior lights and spend the evening hours from 7-10 pm outdoors with their neighbors on patios, front porches, or at a neighborhood block party to demonstrate your support for the community's crime fighting efforts. Residents are invited to attend the Community Barbecue in Community Park beginning at 5 pm for food, refreshments, exhibits, carnival rides, live music and a candle-lit march. Though National Night Out is scheduled one day each year, it is a reminder that crime prevention and community building efforts must be supported each and every day of the year. Remember-**Lights On Means Out For Crime!!!** For more information, contact Sgt. Bryan Pece at 668-2167.

Upcoming Town Center Events

A nice mix musical entertainment has been scheduled each week at the Town Center gazebo through Saturday, August 25th. Come out and enjoy the music, food and refreshments.

Wed., July 4th	7-9:30 pm	Tin Horse (Food Vendor - Lou Malnati's Pizza from 6-9:30 pm)
Thu., July 12th	9:30 pm 7-9 pm	Fireworks Extravaganza co-sponsored by the Carol Stream Park District The Fource (Folk/Rock) (Food Vendor - Village Tavern & Grill from 6-9 pm)
Thu., July 19th	7-9 pm	Cadillac Dave & the Chicago Redhots (Blues) (Food Vendor - Rocco Vino's from 6-9 pm)
Sat., July 21st	11am-2 pm	Rainbow Rockin' Kid's Fest w/ Miss Cathy (Sponsored by Rainbow Academy) (Food Vendor - Rocco Vino's)
Thu., July 26th	7-9 pm	Jim Guter Orchestra (Big Band/Swing) (Food Vendor - Stone Dragon from 6-9 pm)
Sat., July 28th	8:45-10:45 pm	Pirates of the Caribbean I (PG-13) (Rain Date 8/4) (Food Vendor - Baskin Robbins 31 Flavors)
Thu., Aug. 2nd	7-9 pm	Libido Funk Circus (Disco/Funk) Sponsored by Harris Bank of Carol Stream (Food Vendor - Alberto's Rest./Fitzgerald's Tavern from 6-9 pm)
Thu., Aug. 9th	7-9 pm	The Blooze Brothers (Blues Brothers Tribute) (Food Vendor - Culver's Butter Burgers from 6-9 pm)
Sat., Aug. 11th	8:30-10:30 pm	Lord of the Rings I (PG-13) (Rain Date 8/18) (Ice Cream Vendor - Baskin Robbins 31 Flavors)
Thu., Aug. 16th	7-9 pm	Tony Spavone (Italian-American Classics) (Food Vendor - Genoa Pizza from 6-9 pm)
Sat., Aug. 25th	8:30-10:30 pm	The Incredibles (PG-13) (Rain Date 9/1) (Ice Cream Vendor - Baskin Robbins 31 Flavors)

5th Annual Culture Counts! Multicultural Festival

Experience first-hand the transforming power of multiculturalism on Saturday, September 8th from 4-9 p.m. at the Ross Ferraro Town Center. An eclectic evening of native dance, world music and ethnic foods caps off the 2007 concerts series. Bring your family, friends and neighbors to sample the sights, sounds and tastes of distant worlds right in your own back yard. The entertainment lineup includes some of the finest area cultural dancers and musicians. Children are invited to hand paint a diversity mural during the festival. The painting will begin after the opening ceremony and continue throughout the festival.

5th Annual Oktoberfest

When: Sat., September 29th Kid's Programs: 3-5 pm
Family Program: 5-9 pm

Where: Ross Ferraro Town Center under the Large Festival Tent

What: Kid's Oktoberfest: 3-5 pm Tractor Rides, Games, Arts & Crafts, Food, Stilt Walker, Juggler & Balloon Artist
Ken Schultz
Family Time: 5-9 pm
Authentic German Food, Beer & Music
5:25 pm - Tapping of the Ceremonial Oktoberfest Keg
5:30-8:30 pm - **The Musikmeisters** - Bavarian Band

Adm: This is a free all ages event

Info: www.carolstream.org - Current Events - Calendar - September 29th

Welcome New Businesses

The Village welcomes its new businesses and thanks them for choosing Carol Stream as their home base of operation. The Village and the local Chamber hope your business thrives in our community through hard work, innovation and community involvement. The Village encourages all its residents to keep sales tax dollars in the Village by shopping at these and our other local business establishments.

Business Profile: TW Metals - 235 Tubeway Dr.

For decades, customers worldwide have depended on *TW Metals* for top-quality stainless steel, aluminum, copper, brass and nickel flat-rolled products. An international company headquartered in Exton, Pennsylvania, *TW Metals* has facilities in North America, Europe and Asia.

TW Metals was formed in 1998 through the merger of *Tubesales* and *Williams & Company*. Founded in 1907, *Williams and Company* grew from a steel tubing distributor to one of America's most respected providers of pipe and tubing products. *Tubesales*, 39 years its junior, opened in 1946 selling war surplus alloy airframe tubing on the West Coast. *Tubesales* constructed its facilities in Carol Stream in 1976, and those facilities now serve as the *TW Metals* Chicago office. Additional strategic acquisitions over the years have contributed to *TW Metals*' growing strength.

Today's *TW Metals* employs state-of-the-art processing equipment and technology, and continues to strive for success. The company has created Centers of Excellence that have improved its business processes and procedures. In November 2006, Bob Mraz, *TW Metals*' Vice President of Sales and Marketing, was named a finalist in the "Global Sales Leader of the Year" category in the 2006 *Selling Power Sales Excellence Awards*.

Carol Stream is proud to salute *TW Metals*, and we wish them continued success. For more information, visit their website at <http://www.twmetals.com/>.

Carol Stream Job Board as of June 2007

The jobs listed below are provided as a service to the residents and businesses in the Village. Please contact the business directly to inquire about a listed job(s).

In a continuing effort to assist registered Carol Stream businesses in identifying candidates for open employment positions, the Village will use its media resources (Public Access Channel 6, our website and the Correspondent newsletter) to help advertise the available jobs. To post a job opening, complete the form below. For questions concerning the job posting service please call Dawn Moser, Employee Relations Dept. at 871-6242 or email dmoser@carolstream.org.

Historical Society Hosts Fall Program

On Saturday September 15 from 10 am - 3 pm the grounds of the Carol Stream Historical House will be turned into a 'Market Place of Trinkets & Treasures'. Items such as used books, baskets, jewelry, glassware and gently used toys will be for sale at very reasonable prices. An Arts & Crafts Fair will also be a part of the events of the day. Anyone interested in applying for a booth is asked to contact Barbara Tuman at 665-8219. A limited number of spaces will be available. Games for children will be held throughout the afternoon. Refreshments will be served for a nominal fee. The Carol Stream Historical House is located at 301 Lies Road (just west of Hampe Park).

Shop Locally to Support the Christmas Sharing Program

The Village asks residents to use the coupon for Jewel and sign up for the eScrip Dominick's program. Both Jewel and Dominick's Finer Foods are teaming up to assist the Police Department Social Services Unit in raising funds for the 2007 Christmas Sharing program. This annual program is a local volunteer grassroots effort of residents, civic organizations and businesses that give their time, talent and donations of food, clothing, and new children's toys! Please use the Jewel Shop & Share Coupon below on the dates listed when shopping. Jewel will donate 5% of the total purchases, excluding tax, to this year's Christmas Sharing program. This year, Dominick's Finer Foods is using a new program called eScrip. This new program does not involve using coupons when you shop. The eScrip program is designed to automatically earn contributions continually throughout the year from Dominick's each time you shop using your fresh value card! This method of donating is fast and easy! Please call the Social Service Unit at (630) 871-6280 to sign up. Please encourage your friends, neighbors and fellow community members to use the coupon when shopping during the dates listed. Thank you for your participation.
