

CAROL • STREAM CORRESPONDENT

VOLUME 32 #3 • SUMMER 2008

Mayor's Letter

We are in the midst of a typical busy Carol Stream summer. It has been a couple weeks since the closing of the 2008 'Summer in the Center' festival which was an overwhelming success despite a couple days of challenging weather. To host a successful community festival, a lot of financial and program support is needed to do it right. We are lucky to have many supporters of our annual festival, namely the **Holiday Inn Hotel & Suites, the Carol Stream Chamber, Christopher Burke Engineering LTD, Comcast, Home Depot, Baxter & Woodman, Berlin Ind., Hometown RV, the Daily Herald, the Carol Stream Rotary, the American Legion Post 76, CH2MHILL**, as well as the members of **the Carol Stream Youth Council**. I can't thank these companies and people enough for their contribution to this year's festival.

This past April 26th, the Village in partnership with Com2 Computer hosted an Arbor Day Recycling event that allowed residents and the general public to have their personal financial documents shredded in person and also drop off of their unwanted electronics for proper recycling. I am happy to report that 4,000 lbs of paper was shredded on-site and 12,465 lbs. of electronics were collected. The success of this event is due in part to **Mr. Saheem Baloch**, the owner and CEO of Com2 Computer Recyclers who accepted, free of charge all of the electronic devices dropped off for recycling. Please note, residents can drop off their unwanted computers for free at the Com2 Facility located at 195 E. Kehoe Blvd. every Saturday from 11am – 2 pm. The Village hopes to host a similar type of event each year in our efforts to foster recycling community-wide.

At the June 2nd Village Board meeting, members of the 2nd grade Carol Stream Cubs baseball team were in attendance to recite the pledge of allegiance. Cub players included (Top) **Kieran Schoaf, Ricky Gieser, Matt Natzke, Hunter Eidel** and (Bottom) **Jacob Pounders, Eli Ringate and Dylan Davidson**. The Board and I honored at that same meeting Jay Stream School staff person **Paula Connor** who was given official commendation

by Chief Rick Willing for her efforts to assist the department in managing a very serious school threat. Ms Connor is a model citizen for her efforts to secure the safety of students and staff at her workplace Jay Stream school. Also honored that evening was

Corporal Robert White for achieving a 250 arrest milestone in the 5 year history of the IDOT -DUI program. The dedication of Corporal White in keeping the local roadways free of drunk and impaired drivers has helped save many lives and prevented the senseless loss of property and personal injury that oftentimes results from this offense.

This past November, the Village Board and executive staff met in a 2-day strategic planning session during which we discussed at length the challenges facing our community. During these sessions, we developed a prioritized list of goals that will guide the Village Board and staff in carrying out its mission during the upcoming 3 fiscal years. One of the prioritized goals included 'continued progress to make Carol Stream a Green Community'. Much progress has been made toward advancing this goal which includes the development of a comprehensive Environmental web portal accessed from the Village's homepage. The development of this information portal was coordinated by **Jim Knudsen**, the Village's Engineering Services Director who worked with staff to make sure any specific questions a resident or business might have regarding waste reduction, reuse and recycling is sufficiently addressed. I would ask all residents and business owners to visit this site to see what environmental resources it has to offer.

In addition to the development of this web resource, the Village has been looking hard at its operations and identifying ways it can be more environmentally-friendly in carrying out its mission. Some of the many actions we have taken as a service organization to improve our overall stewardship of the environment include the restoration of pond shorelines using native plantings, the right-sizing of fleet purchases, the purchase of hybrid and alternative fuel vehicles, the transition to LCD computer monitors, the development of a wintertime pre-wetting/anti-icing program that drastically reduces the use of road salt and the associated chlorides entering local streams, the standard practice of recycling and reusing asphalt and concrete from local infrastructure maintenance proj-

Mayor's Letter (continued from page 1)

ects, the adoption of amended building codes requiring the installation of low-flow devices in toilets, shower heads, water faucets and landscape irrigation systems as well as the development of a pedestrian pathway system connecting the Village to the regional great western trail system just to name a few.

The Village will continue to promote environmental stewardship all throughout the Town Center summer concert series by raffling off rain barrel compliments of **Mike Schatz of Chicago Rain Barrel Co.**, backyard composters compliments of **Flood Brothers Disposal Co.**, reusable cloth shopping bags compliments of **Joe Cotton Ford, the Chamber of Commerce, Massage Clinique** and sports bottles compliments of the Village. Please take advantage of the music and movie programs we offer and bring your family, friends and/or neighbors to the Town Center to have a pre-event summer picnic from one of our featured food vendors instead of turning on your stove or backyard barbecue grill.

In closing, I want to remind you of an article on the Village's Automatic Traffic Light Enforcement program on page 7 of the winter newsletter. The Police Department will soon begin video enforcement of 3 approved intersections in an effort to reduce red light accidents. Red light running has become a nationwide problem and is the leading cause of automobile crashes in metropolitan regions. In many jurisdictions including Carol Stream, a yellow light has come to symbolize for many motorists 'hurry up' and not 'slow down' as it is intended. National traffic accident statistics report that more than 50% of the deaths in red light running crashes are other motorists and pedestrians. Post accident analysis has shown that red light runners are more than 3 times likely than red light compliers to have multiple speeding violations on their driving record. There is no doubt that red light runners are dangerous drivers who irresponsibly and recklessly put other law abiding motorists and innocent pedestrians at risk. The Village is working with its vendor to ensure the program's implementation is seamless and that startup issues are handled quickly and effectively. For more information, read the companion article on page 6 of this newsletter.

I look forward to seeing all of you at the 4th of July parade beginning at 10 am and summer concert and fireworks extravaganza at the Ferraro Town Center that evening.

Sincerely,

Frank Saverino Sr.
Mayor

School District 93 Hosts New Student Registration

New student registration will be held on Wednesday, August 13th at 2 District 93 schools; namely Jay Stream Middle School and Stratford Middle School. Families with students who will attend Carol Stream, Western Trails, Heritage Lakes or Jay Stream Middle Schools should register at Jay Stream Middle School, 283 El Paso Lane in Carol Stream. Families with students who will attend Roy DeShane, Elsie Johnson, Cloverdale or Stratford Middle Schools will register at Stratford Middle School, 251 Butterfield Drive, Bloomingdale. Registration at both sites will take place from 7:30 a.m.- 2 p.m. and from 5-7 p.m. If you live within the district boundaries, please tell your new neighbors. For additional information, please call the District Office at (630) 893-9393.

18th Annual Back-to-School Fair

The 18th annual DuPage County Back-to-School Fair will be held at the DuPage County Fairgrounds in Wheaton on Wednesday, August 6th from 11 a.m. until 6 p.m. The Back-to-School Fair is a one-stop shopping event for health and human services for low-income families residing in DuPage County with school-aged children. The fair will offer the following free services:

Financial Assistance
School Physicals
Dental & Vision Screening
Child Development Activities
Educational Opportunities
School Supply Certificates
Affordable Housing Info
Social Security Info.
The D.A.R.E. Program
Legal Services
Voter Registration
Employment Opportunities
Child Care Options
Nutrition Advice
School Safety Tips

Parents, you must bring this information to the Fair:

- **Proof of Income** (recent pay stubs, tax return or Public Aid card)
- If you can not provide this information, you must bring **cash income verification** (letter from employer, recent bank statements or note from caseworker)
- **Proof of address in DuPage County:** photo I.D., driver's license or State I.D., and a recent utility bill or lease
- **Identification for children:** birth certificate or medical card

For information, phone Catholic Charities of DuPage County at (630) 495-8008.

Open Enrollment Underway for Fall Adult Citizen Police Academy

An 11-week Adult Citizen Police Academy beginning **Thursday, Sept. 18th through Dec. 4th** will include law enforcement sessions on Investigations/Interrogations, Crime Scene Evidence Processing, DUI Enforcement, Use of Force, Social Services, Dispatching, Firearm Safety, Racial Profiling, Gang & Drug Awareness, Traffic Stops and a Ride along with Patrol. The sessions will be held on Thursday evenings at the Village Hall from 6:30 – 9:30 pm. The deadline for registration is Friday, September 12th. Residents 18 years or older or those who work in town may enroll at (630) 871-6208 or via e-mail at bpece@carolstream.org

July 4th Concert

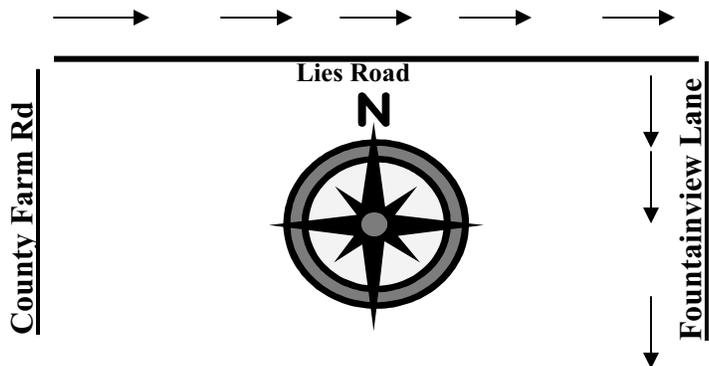

Gather at the Town Center with family, friends and neighbors to celebrate our American freedoms on the evening of Fri., July 4th. Beginning at 7 p.m., the **Country Sky Band**, one of Chicagoland's most sought after country rock bands will take the Town Center stage for a 2-hour concert performance. Starting at 6 p.m., **Lou Malnati's Pizza** will be serving up some of their award-winning pizza and snack food to those in attendance. A fire-works extravaganza at the Town Center will begin at 9:30 pm. Shuttle Bus service to the Town Center from Glenbard North High School and the Simkus Center parking lot will be provided from 6 - 11 p.m. For more information, call 665-7050.

21st Annual Independence Day Parade

The local Parade Committee invites the community to join them in celebrating our democratic freedoms by attending the 21st Annual Independence Day Parade on Friday, July 4th scheduled to kick off at 10 a.m. from Lies Rd. @ County Farm Rd. The parade's theme is 'Care & Service for All Carol Stream' and will feature entertainment for all age groups and include musical floats, clowns, balloons, and give-aways for children in attendance. The parade route is as follows:

2008 Parade Committee members extend their personal thanks to all those who donated their time, hard work and financial resources to make this annual event a community tradition. If you have any questions about this year's event or would like to become a member of next year's planning committee, contact **Kim Gieser at (630) 681-7562 or Linda McCarthy at (630) 588-0205.**

Attend the 25th Annual National Night Out Celebration in Community Park

On **Tuesday, August 5th**, the National Association of Town Watch and the Village's Police Department invites Carol Stream residents to join with communities nationwide to participate in the 25th annual National Night Out Against Crime and Drugs. Residents are encouraged to lock their doors, turn on their home's exterior lights and spend the evening hours from 7-10 p.m. outdoors with their neighbors on patios, front porches, or at a neighborhood block party to demonstrate your support for the community's crime fighting efforts. Residents are invited to attend the **Community Barbecue in Community Park beginning at 5 p.m.** for food, refreshments, exhibits, carnival rides, live music and a candle-lit march. Though National Night Out is scheduled one day each year, it is a reminder that crime prevention and community building efforts must be supported each and every day of the year. Remember-**Lights On Means Out For Crime!!!** For more information, contact Sgt. Bryan Pece at (630) 668-2167.

4th Annual Jonathan Petit Fun Run

Our **Mission** is to address underage drinking in the Carol Stream community. We will work with our village partners to spearhead preventive community wide functions designed to promote the positives within our community. We will enable our young people to live long and healthy lives.

COME JOIN IN! 4th Annual 5K JP Fun Run 2008

HOT DOG EATING CONTEST!
Sponsored by Hot Spot

When? Sunday, August 31, 2008 @ 10:00
Registration begins at 9:15 AM
Where? Armstrong Park * North Pavilion

6th Annual Culture Counts! Multicultural Festival

Experience first-hand the transforming power of multiculturalism on Thursday, August 21st from 6:30 -9:30 p.m. at the Ross Ferraro Town Center. An eclectic evening of native dance, world music and ethnic foods caps off the 2008 concerts series. Bring your family, friends and neighbors to sample the sights, sounds and tastes of distant worlds right in your own back yard. The entertainment lineup includes some of the finest area cultural dancers and musicians that include Indian, Mexican and Irish Dancers and a musical performance by the area's finest world music group - Funkadesi.

6th Annual Oktoberfest

When: Sat., September 27th
Where: Ross Ferraro Town Center
Schedule: 3 - 5 pm - **Kid's Program** (West Field)
 Tractor Rides, Games, Arts & Crafts, &
 Performances by **Juggler/Magician Dave Fleming**
 3- 4:45 pm - **Reunion Jazz Orchestra** (Fest Tent)
 4- 9 pm - Authentic German Food & Beer Served
 5:25 pm - Tapping of the Ceremonial Oktoberfest Keg
 5:30 – 8:30 pm - **The Alpiners** – Bavarian Band (Fest Tent)
 Free, all ages event
Food: Village Tavern & Grill

Emerald Ash Borer (EAB): Know the Facts on Insecticidal Spray Treatment

Factors a homeowner ought to consider when deciding whether to attempt insecticidal spray of a private ash tree (species genus – Fraxinus Only) include the following:

The only certain method to control for the EAB is tree removal;

Healthy trees planted in fertile soil with access to adequate sunlight, wind and moisture will survive attack longer than those in poorer health;

In deciding whether to contract for insecticidal spray treatment, a homeowner must weight the value of the tree in the landscaped location against the treatment's cost knowing you might be signing on for an annual treatment regimen indefinitely;

Leading tree care experts do not recommend spray treatment of ash trees with more than 20% canopy dieback

If many trees are being removed in an area, it will be less costly to have your tree removed than at a later date;

IMPORTANT: A tree in a quarantine zone is subject to removal by governmental agencies regardless of whether it has been treated or shows signs of borer infestation;

In considering a replacement tree, one not susceptible to EAB should be considered which includes Mountain Ash and other ashes outside the Fraxinus family;

Consider a replacement tree that is not overly prevalent in the neighborhood or larger subdivision in an effort to promote species diversity and control for large scale devastation of other infestations;

Insecticidal spray treatment is much more effective on ash trees with smaller trunk diameters (10 in. or less);

It is more difficult to keep an infested tree alive regardless of whether dieback has occurred;

Research will best determine if tree survival continues or if insecticidal treatment is just delaying the death of the tree.

AM 530 - Carol Stream's New Emergency Advisory Radio Station

The Village has recently installed an AM radio antennae to provide residents, businesses and customers information on municipal services, events as well as public safety advisories. Regular informational broadcasts will operate 24/7 and can be received on any AM radio. Reception is best from your vehicle or from a home or business's external antenna. During a disaster, emergency advisories and announcements will be broadcast. The National Weather Service NOAA weather radio will also be carried live on this frequency when severe weather approaches.

West Nile Virus (WNV) Infection Protection

Mosquito Bites - protecting yourself and family:

- **Sparingly apply insect repellent to exposed skin.** The more DEET a repellent contains the longer it will protect you from mosquito bites. Choose a repellent that provides protection for the amount of time that you will be outdoors.
- Avoid applying repellent to the hands of children;
- Be sure to read and follow the manufacturer's directions for use, as printed on the product;
- **Spray clothing with repellents** containing permethrin or DEET since mosquitoes may bite through thin clothing. Do not apply repellents containing permethrin directly to exposed skin.
- Whenever possible, **wear long-sleeved shirts and long pants outdoors.**
- **Place mosquito netting over infant carriers** when outdoors.
- **Stay indoors during peak biting times** - dawn, early evening & dusk.
- Install or repair window and door screens.

Breeding Sites - reduce their number around your house:

- **Twice a week, empty water from** flower pots, pet food and water dishes, birdbaths, swimming pool covers, buckets, barrels, and cans;
- **Check gutters for clogged down spouts;**
- **Remove discarded tires and other items that collect water.**
- **Check under your bushes, shed or deck for empty cans or bottles** that can collect water.
- Keep the length of your grass short.

Avoiding Exposure to Pesticide Spraying - those with upper respiratory or allergic conditions should follow take the following precautions to minimize possible exposure to pesticides:

- **Phone Clarke Mosquito Control Hotline at (800) 942-2555 for announcements about scheduled area spraying.** and remain indoors during applications in the immediate area.
- **Those with chemical sensitivities** or who feel spraying may aggravate a preexisting health condition, should consult their physician or local health department to inquire about special measures to avoid exposure.
- **When spraying is taking place in immediate area,** stay indoors, close windows and turn off window-unit air conditioners.

Reporting Dead Birds to the DuPage County Health Department - Dead birds may be a sign that West Nile virus is circulating between birds and the mosquitoes in the area. Remember that birds die from many other causes besides West Nile virus. **Dead crows and blue jays are important sentinels for detecting the West Nile Virus** and these dead birds will again be collected by the Health Department.

Persons with questions may contact the West Public Health Center in Wheaton at (630) 682-7560.

Digital Converter Box Program Coupon

At midnight on February 17, 2009, all full-power TV stations in the country will stop broadcasting in analog and move to 100% digital broadcasting. Digital broadcasting provides a cleaner and clearer picture and more programming options in addition to opening up the air-waves for use by emergency responders.

The U.S. Congress created a Converter Box Coupon Program for households who want to continue using their analog TVs after February 17, 2009. This allows households to obtain up to 2- \$40 coupons that can be used toward the cost of eligible converter boxes. Please note that a TV set connected to cable, satellite or other service does not require a converter box. Consumer options include:

- Keep your existing analog TV and purchase a TV converter box;
- Connect to cable, satellite or another pay service, or
- Purchase a television with a digital tuner.

For more information on the TV Converter Box Program, visit www.dtv2009.gov

Village Adopts Ticket Fee Schedule for Failure to Display a Vehicle Sticker

All motorized vehicles housed in the Village overnight are required to display a current valid vehicle sticker on the lower right corner of the front windshield before Tuesday, July 1st. **Vehicle owners who fail to display a valid 2008 vehicle sticker by the July 1, 2008 deadline will be issued a \$20 ticket through Thursday, July 31. Beginning August 1, 2008, vehicle owners who fail to display a valid 2008 vehicle sticker will be subject to a \$100 ticket.** Ticket charges are in addition to any fees associated with the purchase of an annual Village vehicle sticker. The cost of the sticker doubles if not purchased by the July 1, 2008 deadline and is increased an additional \$5 each month until a valid 2008 sticker is purchased.

Illegal Fireworks Will Result in \$250 Ticket

The State of Illinois has long made the possession, sale and use of fireworks a punishable offense under state statute with an associated minimum fine of \$500 and a maximum up to \$1,000. The Village, under its home rule powers is now able to enforce this law under local ordinance with an associated \$250 hang on ticket which must be paid within 10 days to avoid having the offense prosecuted in the Circuit Court of DuPage County. Repeated or more serious fireworks violations can still be charged under Illinois State Statute resulting in graduated fines. The definition of fireworks whose possession, use and/or sale are punishable under local ordinance and state statute include the following:

- Blank cartridges
- Firecrackers,
- Torpedoes,
- Sky rockets,
- Roman candles,
- Toy cannons using explosives
- Balloons requiring fire underneath
- Bombs or highly charged fireworks;
- Fireworks containing an explosive compound;
- Tablets or other devices containing an explosive or combustible substance(s) that produces visual effects.

The following **SHALL NOT BE CONSIDERED FIREWORKS** under the definition detailed in the Village Code/State Statute:

- Snake or Glow worm pellets;
- Smoke devices;
- Sparklers;
- Trick noisemakers (aka "party poppers", "bobby traps", "snappers");
- Toy pistols, canes, guns, or other devices in which paper or plastic caps which contain twenty-five hundredths grains or less of explosive compound;
- Toy pistol paper or plastic caps containing less than twenty-five hundredths grains of explosive mixture.

Police to Begin Photo Enforcement at 3 Local Intersections

The Village Board approved an Automatic Traffic Light Enforcement (ATLE) program that will monitor and conduct radar/photo surveillance of the following targeted intersections beginning this summer:

North Ave. @ Gary Ave. – East & West Bound Lanes
North Ave. @ Kuhn Rd. - West Bound Lanes

The development of technology to assist law enforcement agencies with traffic safety has grown exponentially and has been a very useful tool in increasing traffic safety at high speed intersections. Round the clock monitoring of high speed intersections is much more effective in changing drivers' behavior than hoping a patrol officer is in the right place at the time of a traffic violation. The program statistics regarding red light enforcement programs have substantiated the effectiveness of photo enforcement of intersections.

A 2005 U.S. Federal Highway Administration-funded study estimated total societal cost reductions from red light camera programs in seven U.S. cities to be over \$14 million per year, or over \$38,000 for each studied red light camera location.

A multi-year study of the red light camera program in Virginia Beach, Virginia found that red light running violations more than tripled after the law that permitted the city to use red light cameras was allowed to expire in 2005.

The ATLE program will have little impact on motorists who routinely drive the speed limit and regulate their speed when approaching a signalized intersection. Motorists who regularly surpass speed limits or increase their speed approaching a signalized intersection are given advance warning to begin to assess the safety of their driving habits and make the necessary changes in anticipation of the program's implementation.

Village Launches Environmental Web Portal

The Village has created an environmental web portal to assist the community-at-large in adopting sustainability principles on a daily basis both at home and most especially in the product and service market place. The new environmental web portal includes detailed information on energy reduction, water conservation, waste reduction (recycling and reuse) and air quality improvement measures.

The new environmental web portal can be accessed at: www.carolstream.org/Services/Engineering/GreenCarol%20Stream.html

TURNING CAROL STREAM BLUE TO GREEN

Why should the Village and its residents be concerned about our environment?

Why should we spend money, time and effort protecting it? Is it really worth it?

I believe it is important, and so does your Board of Trustees. We passed a resolution joining the Metropolitan Mayors Caucus' Greenest Region Compact. I invite you to see what the Village is doing and what you can do to make an impact.

Click on an area of interest from the topics to the left and right, and begin your journey to making Carol Stream an environmentally healthy place to live and work.

LET'S GREEN CAROL STREAM

TURNING CAROL STREAM BLUE TO GREEN

Recycling is the process of transforming old materials into new products.

In doing so, old materials become the raw materials for the manufacture of useful materials thereby reducing the consumption of fresh raw materials, energy usage, air from incineration and water from pollution by reducing the need for 'conventional' waste disposal and consequently lowering greenhouse gas emissions as compared to virgin production.

Recyclables typically originate from homes, businesses and industry and include glass, paper, metal, textiles and plastics. Recycling is the third component of the "Reduce, Reuse, Recycle" waste hierarchy.

TURNING CAROL STREAM BLUE TO GREEN

Most of us take for granted the air that we breathe.

We don't think that every time we inhale we are not only breathing in the sustaining oxygen but also other gasses, elements and particulate matter, all of which can be dangerous to our health.

According to the World Environmental Protection Agency (WEPA), "World has made significant strides in improving air quality." Over the last decade particulate matter has decreased:

Particulate Matter	8%
Sulfur Dioxide	26%
Nitrogen Dioxide	6%
Carbon Monoxide	32%
Lead	30%
Ozone	10%

- 
WASTE REDUCTION

TURNING CAROL STREAM BLUE TO GREEN

The Environmental Protection Agency puts a higher priority on waste reduction than they do on recycling.

Carol Stream recycles 27% of the amount of waste they generate. That's a real success for the Village!

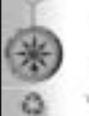

The most common waste materials recycled are paper and plastic. 30% of the waste that Carol Stream recycles is made to be recycled into new products. The remaining 70% is recycled into energy. The remaining 30% is recycled into energy. The remaining 30% is recycled into energy.

Carol Stream has implemented an advanced technology computerized system for waste to make recycling the Village. This system is the Industrial Waste Management System (IWMS) located at 2000 E. 10th Street, Carol Stream, IL 60131.

TURNING CAROL STREAM BLUE TO GREEN

Storm water is a valuable resource.

Run water has been a major source of pollution in the past. The primary concern is water runoff.

Runoff water can be collected, stored, and used for irrigation, landscaping, and other uses. This is a great way to conserve water and reduce pollution.

There are many ways to collect and use storm water. Here are some ideas:

- Rainwater Harvesting
- Green Roofs
- Stormwater Detention
- Permeable Pavement

Summer Blood Drive - Battle of the Badges Donor Competition

The summer blood drive is scheduled for Tue., August 26th, from 2:30 – 7:30 p.m. at the Bielawski Municipal Center at 500 N. Gary Ave. Rd. Police Officers and firefighters are **Hometown Heroes** who know how important it is to have all types of blood ready for transfusion. Each year, nearly 6 million people in our nation need a lifesaving blood transfusion and 38,000 pints of blood are needed daily. To this end, Carol Stream Police Officers will go head to head in a Battle of the Badges donor challenge competition against the Carol Stream Fire Protection District firefighters and paramedics to raise awareness about the ongoing need for blood donations. Along with friends and family of local Police Officers and Firefighters, residents and the general public can make an individual appointment by phoning the Heartland Blood Center at (630) 892-7055 or make an in person walk up appointment for which you can donate your pint to either team.

ComEd Rolls Out its New Energy Efficiency Programs

As of June 1st, Commonwealth Edison rolled out several energy-efficiency programs for both its residential and business customers to help them save on their energy costs and encourage overall demand reduction. ComEd shares the administration of these programs with the Illinois Department of Commerce and Economic Opportunity (DCEO) of which 25 % of the overall funding, is dedicated to municipalities, schools and low-income customers.

Residential Programs:

Residential Lighting- this program offers customers instant rebates when they purchase compact fluorescent lamps (CFLs) and qualifying specialty lamps. For example, customers could purchase deeply discounted 60- to 100-watt CFL-equivalent bulbs and 3-way or dimmable bulbs.

Appliance Recycling- Residential customers receive financial incentives for turning in inefficient air conditioners and secondary refrigerators and freezers. For example, an older secondary refrigerator in a basement may be eligible for recycling under this program.

Residential Multi-Family “All-Electric” Sweep. This program uses contractors to install electricity-saving measures in apartments and condominiums that use electricity for heating. These measures could include new hot water heater wraps, pipe insulation, low-flow showerheads, CFLs, and high-efficiency clothes washers and dryers in common areas.

Nature First Demand Response. – This program allows Com-Ed to turn customers’ air conditioner compressors on and off during periods when electricity demand is high. Participants in the program earn bill credits. More than 55,000 customers currently are enrolled and receive bill credits up to \$10 per month in the summer months.

Business Programs:

Commercial & Industrial Prescriptive- Provides businesses with a menu of pre-approved incentives for environmentally friendly lighting, motors, HVAC equipment and chillers. Commercial and industrial customers would receive a rebate from ComEd for the implementation of these technologies.

Commercial and Industrial Custom Incentives- Businesses can apply for incentives for more complex energy efficiency projects, such as industrial processes upgrades, that provide energy efficiency savings. Applications would show an estimate of proposed savings and require a ComEd engineering review.

For information on these energy efficiency program offerings, visit

www.exeloncorp.com/ourcompanies/comed/comedsave/default.htm

Operation Helping Hand

The Village is pleased to announce a new initiative to assist seniors and residents with disabilities. The Police Department’s Social Services Unit is currently registering residents with special needs in the DuPage County Operation Helping Hand Program. This program is designed to assist the Police and Fire departments in quickly identifying, assisting, and if necessary, evacuating residents with special needs in the event of a natural or man-made emergency.

To register, visit the program website at www.citizencorpsdupage.org, or call the Social Services Unit at (630) 871-6280. We will be happy to answer your questions and register you, as well. **Registration is fast and easy and could make a difference to you or your loved ones during an emergency – Register Right Away!**

Historical Society to Host 5th Annual ‘Market Place’

The 5th Annual ‘Market Place’ sponsored by the Carol Stream Historical Society will be on **Saturday, September 13 from 10:00 a.m. - 3:00 p.m.** on the grounds of the Historic Farmhouse located on Lies Road, west of Hampe Park. Once again the market will include crafters, flea market items, home based business vendors and antique dealers. An application can be obtained by contacting Barb Simkus at 630-665-8219.

A used book sale as well as a “limited edition” Christmas ornament with a picture of the farmhouse will also be available on that day. Children’s activities will be held from 11:00 a.m. to 1:00 p.m. including for a nominal fee the opportunity to have their picture taken on the 1934 Tractor located at the site.

Light refreshments will be served.

For more information, contact Barb O’Rahilly at 630-665-0686.

Calling All Juried Crafters

Juried crafters are asked to consider participating in the Annual Glenbard North H.S. Athletic Boosters Craft Fair & Holiday Hodge Podge on Sat., Nov. 1st from 9 am - 3 pm in the high school’s gymnasium. For information, phone the GBN Athletic Boosters Hotline at (630) 681-3378 or visit the web site at www.gbnboosters.org to download an exhibitor’s application.

Carol Stream Water Quality Report - 2007

The Safe Drinking Water Act Amendments of 1996 require that all community water systems provide information to their customers concerning the quality of their water. This report complies with this Act by providing information on the source of your drinking water, the results of water sampling, our compliance with drinking water regulations, as well as some brief educational material.

The Village of Carol Stream is committed to providing you with this information. If upon reading this report you should have any questions or wish additional information, you are encouraged to contact either Al Turner, the Director of Public Works, or Bob Hoffrage, the Water Division Supervisor and Chief Water System Operator at 871-6260. Copies of this Water Quality Report are available on the Village's web page at <http://www.carolstream.org>. Additionally, you are always welcome at the regularly scheduled Village Board Meetings that hold an informal Listening Post at approximately 7:30 p.m., prior to the 8:00 p.m. Board Meeting scheduled for every first and third Monday of the month.

The Village of Carol Stream receives Lake Michigan Water that is processed by the City of Chicago at the Jardine Water Filtration Facility. The Jardine Water Treatment Facility is just north of Navy Pier on the Chicago lakefront. Lake Michigan is the source of water used to provide drinking water for Chicago and many suburban communities, including Carol Stream. Recently, there have been news articles about the presence of pharmaceutical drugs in water samples taken from Lake Michigan. Pharmaceutical drug testing is not currently required by any environmental agency and is not addressed by the sampling included in this report; however the City of Chicago tests for various unregulated contaminants and posts results on their website at <http://www.ci.chi.il.us/Water>. The Village of Carol Stream is a customer of the DuPage Water Commission who purchases the water from the City of Chicago and transports it to the member communities. Water is metered and then pumped into our distribution system and into the elevated and ground storage facilities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the USEPA's Safe Drinking Water Hotline (1-800-426-4791).

Lake Michigan as one of the Great Lakes is an excellent source of drinking water. However, all sources, including lakes, rivers and wells have a possibility of contamination, including contamination such as:

- **Microbial contaminants**, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife;
- **Inorganic contaminants**, such as salts and metals, which can be naturally occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining or farming;
- **Pesticides and herbicides**, which may come from a variety of sources such as agriculture, urban stormwater runoff and residential uses;
- **Organic chemical contaminant**, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff and septic systems;
- **Radioactive contaminants**, which may be naturally occurring or be the result of oil and gas production and mining activities.

Source Water Assessment

The Illinois EPA considers all surface water sources of community water supply to be susceptible to potential pollution problems. The very nature of surface water allows contaminants to migrate into the

intake with no protection only dilution. This is the reason for mandatory treatment for all surface water supplies in Illinois. Chicago's offshore intakes are located at a distance that shoreline impacts are not usually considered a factor on water quality. At certain times of the year, however, the potential for contamination exists due to wet-weather flows and river reversals. In addition, the placement of the crib structures may serve to attract waterfowl gulls and terns that frequent the Great Lakes area, thereby concentrating fecal deposits at the intake and thus compromising the source water quality. Conversely, the shore intakes are highly susceptible to storm water runoff, marinas and shoreline point sources due to the influx of groundwater to the lake. Throughout history, there have been extraordinary steps taken to assure a safe source of drinking water in the Chicagoland area. From the building of the offshore cribs and the introduction of interceptor sewers to the lock-and-dam system of Chicago's waterways and the city's Lakefront Zoning Ordinance. The city now looks to the recently created Department of Water Management, Department of Environment and the MWRDGC to assure the safety of the city's water supply. Also, water supply officials from Chicago are active members of the West Shore Water Producers Association. Coordination of water quality situations (i.e., spills, tanker leaks, exotic species, etc) and general lake conditions are frequently discussed during the association's quarterly meetings. Also, Lake Michigan has a variety of organizations and associations that are currently working to either maintain or improve water quality. Finally, one of the best ways to ensure a safe source of drinking water is to develop a program designed to protect the source water against potential contamination on the local level. Since the predominant land use within Illinois' boundary of Lake Michigan watershed is urban, a majority of the watershed protection activities in this document are aimed at this purpose. Citizens should be aware that everyday activities in an urban setting might have a negative impact on their source water. Efforts should be made to improve awareness of storm water drains and their direct link to the lake within the identified local source water area. A proven best management practice (BMP) for this purpose has been the identification and stenciling of storm water drains within a watershed. Stenciling along with an educational component is necessary to keep the lake a safe and reliable source of drinking water.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. USEPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbial contaminants are available from the USEPA's **Safe Drinking Water Hotline (1-800-426-4791)**.

In order to ensure that our water is safe to drink, the USEPA prescribes regulations that limits the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water, which must provide the same protection for public health.

Attached are several tables indicating the constituents that are regulated for which the Chicago/Carol Stream drinking water has been tested. The data is separated into data as tested by the City of Chicago as the parent supply of our drinking water and the Village of Carol Stream as the satellite supplier.

Neither the City of Chicago nor the Village of Carol Stream had any water quality violations during 2007.

Carol Stream Water Quality Report - 2007

Regulated Contaminants Detected in 2007 (collected in 2007 unless noted)

Lead and Copper

Date Sampled: 12/31/2005

Definitions:

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Action Level Goal (ALG): The level of a contaminant in drinking water below which there is no known or expected risk to health. ALG's allow for a margin of safety.

Lead MCLG	Lead Action Level (AL)	Lead 90th Percentile	# Sites Over Lead AL	Copper MCLG	Copper Action Level (AL)	Copper 90th Percentile	# Sites Over Copper AL	Likely Source of Contamination
0	15 ppb	<5 ppb	0	1.3 ppm	1.3 ppm	<0.100 ppm	0	Corrosion of household plumbing systems; Erosion of natural deposits

Water Quality Test Results

Definitions: The following tables contain scientific terms and measures, some of which may require explanation. Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCL's are set as close to the Maximum Contaminant Level Goal as feasible using the best available treatment technology. Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLG's allow for a margin of safety. mg/l: milligrams per litre or parts per million - or one ounce in 7,350 gallons of water. ug/l: micrograms per litre or parts per billion - or one ounce in 7,350,000 gallons of water. na: not applicable. Avg: Regulatory compliance with some MCLs are based on running annual average of monthly samples. Maximum Residual Disinfectant Level (MRDL): The highest level of disinfectant allowed in drinking water. Maximum Residual Disinfectant Level Goal (MRDLG): The level of disinfectant in drinking water below which there is no known or expected risk to health. MRDLG's allow for a margin of safety.

Regulated Contaminants

Disinfectants & Disinfection By-Products	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source Of Contaminant
TTHMs [Total Trihalomethanes]	10/9/2007	43.4	14.8-43.4	N/A	80	ppb	No	By-product of drinking water chlorination
Total Haloacetic Acids (HAA5)	12/1/2007	10.1	8.3-15.17	N/A	60	ppb	No	By-product of drinking water chlorination
Chlorine	12/31/2007	0.50	0.4375-0.5750	MRDLG=4	MRDL=4	ppm		Water additive used to control microbes

Note: The state requires monitoring of certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. Therefore, some of this data may be more than one year old.

Carol Stream Water Quality Report - 2007

-Definition of Terms-

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Level Found: This column represents an average of sample result data collected during the CCR calendar year. In some cases, it may represent a single sample if only one sample was collected.

Range of Detections: This column represents a range of individual sample results, from lowest to highest that were collected during the CCR calendar year.

Date of Sample: If a date appears in this column, the Illinois EPA requires monitoring for this contaminant less than once per year because the concentrations do not frequently change. If no date appears in the column, monitoring for this contaminant was conducted during the Consumer Confidence Report calendar year.

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

nd: Not detectable at testing limits. n/a: Not applicable

Detected Contaminants

Contaminant (unit of measurement) Typical Source of Contaminant	MCLG	MCL	Highest Level Detected	Range of Detections	Violation	Date of Sample
--	------	-----	------------------------	---------------------	-----------	----------------

Microbial Contaminants

TOTAL COLIFORM Bacteria (% pos/mo) Human and animal fecal waste	0	5%	0.54% in July	n/a		
FECAL COLIFORM AND E. COLI (# pos/mo) Human and animal fecal waste	0	0	2	n/a		
TURBIDITY (%<0.3 NTU) Soil runoff. Lowest monthly percent meeting limit.	n/a	TT/95%	100%	n/a		

TURBIDITY (NTU) Soil runoff. Highest single measurement.	n/a	TT= 1 NTU max	0.58	n/a		
---	-----	------------------	------	-----	--	--

Inorganic Contaminants

ARSENIC (ppb) Erosion of natural deposits; Runoff from orchards; Runoff from glass and electronics production wastes.	0	10	0.56	0.52-0.56		
BARIUM (ppb) Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits.	2	2	0.018	0.018-0.018		
NITRATE (AS NITROGEN) (ppm) Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.	10	10	0.41	0.37-0.41		
TOTAL NITRATE & NITRITE (ppm) Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.	10	10	0.42	0.37-0.42		

Disinfectants\Disinfection By-Products

TTHMs [TOTAL TRIHALOMETHANES] (ppb) By-product of drinking water disinfection.	n/a	80	16.5*	9.9-24.0		
HAA5 [HALOACETIC ACIDS] (ppb) By-product of drinking water disinfection.	n/a	60	8.53*	4.6-12.3		
CHLORINE (AS c112) (PPM) Drinking water disinfectant.	4.0	4.0	0.77	0.65-0.77		

TOC [TOTAL ORGANIC CARBON]
The percentage of Total Organic Carbon (TOC) removal was measured each month and the system met all TOC removal requirements set by IEPA.

Unregulated Contaminants

Contaminant (unit of measurement) Typical Source of Contaminant	MCLG	MCL	Highest Level Detected	Range of Detections	Violation	Date of Sample
SULFATE (ppm) Erosion of naturally occurring deposits.	n/a	n/a	20.6	19.1-20.6		

Carol Stream Water Quality Report - 2007

State Regulated Contaminants

FLUORIDE (ppm) Water additive which promotes strong teeth.	4	4	0.98	0.90-0.98
SODIUM (ppm) Erosion of naturally occurring deposits; Used as water softener.	n/a	n/a	7.40	7.30-7.40

Radioactive Contaminants

BETA/PHOTON EMITTERS (pCi/l) Decay of natural and man-made deposits.	0	50	2.000	nd-2.000	11/05/2001
---	---	----	-------	----------	------------

Unit of Measurement

ppm - Parts per million, or milligrams per liter
 ppb - Parts per billion, or micrograms per liter
 NTU - Nephelometric Turbidity Unit, used to measure cloudiness in drinking water
 %<0.5 NTU - Percent samples less than 0.5 NTU
 pCi/l - Picocuries per liter, used to measure radioactivity

Water Quality Data Table Footnotes

TURBIDITY - Turbidity is a measure of the cloudiness of the water. We monitor it because it is a good indicator of water quality and the effectiveness of our filtration system and disinfectants.

UNREGULATED CONTAMINANTS - A maximum contaminant level (MCL) for this contaminant has not been established by either state or federal regulations, nor has mandatory health effects language. The purpose for monitoring this contaminant is to assist USEPA in determining the occurrence of unregulated contaminants in drinking water, and whether future regulation is warranted.

FLUORIDE - Fluoride is added to the water supply to help promote strong teeth. The Illinois Department of Public Health recommends an optimal fluoride range of 0.9 mg/l to 1.2 mg/l.

SODIUM - There is not a state or federal MCL for sodium. Monitoring is required to provide information to consumers and health officials that are concerned about sodium intake due to dietary precautions. If you are on a sodium-restricted diet, you should consult a physician about this level of sodium in the water.

* Highest Running Average computed quarterly

2007 Non-regulated Contaminant Detections

The following table identifies contaminants detected within the past five years. State and federal regulations do not require monitoring for these contaminants and no maximum contaminant level (MCL) has been established. These detections are for informational purposes only. No mandated health effects language exists. The CCR Rule does not require that this information be reported; however, it may be useful when evaluating possible sources of contamination or characterizing overall water quality.

-Definition of Terms-

Level Found: This column represents an average of sample result data collected during the CCR calendar year. In some cases, it may represent a single sample if only one sample was collected.

Range of Detections: This column represents a range of individual sample results, from lowest to highest that were collected during the CCR calendar year.

Date of Sample: If a date appears in this column, the Illinois EPA requires monitoring for this contaminant less than once per year because the concentrations do not frequently change. If no date appears in the column, monitoring for this contaminant was conducted during the CCR calendar year.

<i>Contaminant (unit of measurement)</i>	<i>Highest Level Detected</i>	<i>Range of Detections</i>
--	-------------------------------	----------------------------

Additional Contaminants

BORON (ppb) Erosion of naturally occurring deposits; Used in detergents and as a water softener; Used in production of glass, cosmetics, pesticides, fire retardants, and for leather tanning.	28.0	28.0-28.0
--	------	-----------

MOLYBDENUM (ppb)	31.0	0-31.0
-------------------------	------	--------

Unit of Measurement - Definition

ppb - Parts per billion, or micrograms per liter

0316000 CHICAGO

2007 Violation Summary Table

<i>Violation Description</i>	<i>Start</i>	<i>End</i>
------------------------------	--------------	------------

No drinking water quality violations were recorded during 2007

Used Tire Recycling Event

Waste tires are collected at these events free of charge. However, participants must sign an agreement stating they will not accumulate waste tires in the future and that they have no waste tires remaining on their property. Future accumulation of used and waste tires is a violation of environmental law. The Agency advises motorists purchasing new tires to leave their used tires with their retailer, who must, by law, accept used tires for recycling.

Illinois residents may participate by bringing waste tires to the designated collection points during the dates indicated. The maximum number of tires any individual may bring is 1,000. Those who have participated in previous collections are ineligible. No tires will be accepted from companies that generate used tires in the normal course of business operations (i.e. commercial trucking companies, tire retailers, etc.). Car, truck and tractor tires will be accepted, but not large industrial or off-road tires.

University Park, IL.

12 Ways to Green

This past January, ComEd launched 12 Ways to Green, a campaign encouraging its customers to work together with the electric utility to reduce energy bills and help the environment at the same time. ComEd's 12 Ways to Green campaign is part of a comprehensive environmental strategy to reduce greenhouse gas emissions and reduce the carbon footprint of Exelon, its subsidiaries and customers. If customers follow the 12 Ways to Green, they could reduce their annual carbon footprint by about 4,000 pounds. Every 3 customers that reduce their carbon footprint by this amount will take the equivalent of one car off the road. Once a month, ComEd will launch new environmental initiatives through the media, in customer newsletters and here at its 12 Ways to Green web portal:

www.exeloncorp.com/ComedCare_Main/ComedCare/act/WaysToGreen/

Illinois Clean Energy Foundation Awards Village Energy Efficiency Grant

This past April, the Village received notice from the Illinois Clean Energy Foundation that its grant application seeking \$3,155 in funding to replace current lighting in its Police Department facilities with energy efficient lighting was approved in total.

With this grant award, the Village will be able to replace 200, 4-lamp ceiling light fixtures with magnetic ballasts that draw approximately 38,400 watts of electricity with 140, 2-lamp ceiling light fixtures with electronic ballasts with a reduced energy demand of 14,060 watts of electricity (-173%), 20, 2-lamp ceiling fixtures with magnetic ballasts that draw 1,920 watts of electricity with 20, 2-lamp ceiling light fixtures that draw only 580 watts of electricity (-231%) as well as the replacement of 20, 40-watt incandescent exit signs having an energy demand of 800 watts of electricity with 10, 2-watt LED exit signs with a total energy demand of 20 watts (-390%). In total, this lighting upgrade project will reduce the energy demand of the Village's Police Department facility by 26,460 watts an overall 180% reduction in energy demand.

Buying Green Cleaning Products

As "green" becomes cache, the market place has been overwhelmed with a vast array of new products to help your business reduce its negative environmental impacts. We have compiled the following purchasing guidelines to help you assess how environmentally friendly a product is. In depth fact sheets can be found at www.cleanaircounts.org.

Cleaning Products: Green cleaning can lead to enormous pollution reductions. Clean Air Counts businesses have reduced pollution by over 700,000 pounds thanks to low VOC products. To ensure that you are using an environmentally preferable product read the Material Safety Data Sheet (MSDS). The physical and chemical property section may provide the VOC content, other sections will provide safety information. MSDS sheets are very important and should be accessible for all cleaning products used by a business.

In addition, you can use the www.greenseal.org website, which provides lists of certified products. Products only become Green Seal certified after rigorous testing and evaluation, including on-site plant visits. Green Seal certifies:

- Hand Cleaners
- Electric Chillers
- Cleaners
- Cleaning Services
- Floor Care Products
- Paints & Coatings
- Papers & Newsprint
- Windows & Doors

Local Clean Air Counts Recognizes Windsor Park Manor Senior Campus

Windsor Park Manor, a retirement community on the south side of North Ave was recognized by the Chicagoland Clean Air Counts organization for the substantial impact they have made on local air quality as an active participant in the USEPA Energy Star Building program. A member of the organization since 2006, Windsor Park Manor has planted a significant amount of native landscaping in and around their campus and installed energy efficient lighting throughout their beautiful campus. To date, over 1,500 incandescent light bulbs have been replaced with low wattage fluorescent bulbs, reducing annual energy costs by an impressive \$63,000 and substantially reducing air pollution and green house gases by approximately 10,995 pounds.

Under the direction of Campus Administrator Ron Jaeger, the staff and residents are congratulated for this accomplishment and their wonderful example of environmental stewardship to the Carol Stream community.

10 Foreclosure Prevention Musts

1. Don't ignore the problem. The further behind you become, the harder it will be to reinstate your loan and the more likely that you will lose your house.

2. Contact your lender as soon as you realize that you have a problem. Lenders do not want your house. They have options to help borrowers through difficult financial times.

3. Open and respond to all mail from your lender. The first notices will offer information about foreclosure prevention options that can help you weather financial problems. Later mail may include important notices of pending legal action. Your failure to open mail will not be an excuse in court.

4. Know your mortgage rights. Find your loan documents and read them so you know what your lender may do if you can't make payments. Learn about foreclosure laws and timeframes in your state (every state is different) by contacting the State Government Housing Office.

5. Understand foreclosure prevention options. Valuable information about foreclosure prevention (or loss mitigation) options can be found at:

- www.dhoc.org • www.nafpp.org •
- www.hud.gov • www.preventmyforeclosure.com •

6. Contact a HUD-approved housing counselor. The U.S. Department of Housing and Urban Development (HUD) funds free or very low cost housing counseling nationwide. Housing counselors can help you understand the law and your options, organize your finances and represent you in negotiations with your lender if you need this assistance.

7. Prioritize your spending. After healthcare, keeping your house should be your first priority. Review your finances and see where you can cut spending in order to make your mortgage payment. Look for optional expenses-cable TV, memberships, entertainment-that you can eliminate. Delay payments on credit cards and other "unsecured" debt until you pay your mortgage.

8. Use your assets. Do you have assets-a second car, jewelry, a whole life insurance policy-that you can sell for cash to help reinstate your loan? Can anyone in your household get an extra job to bring in additional income? Even if these efforts don't significantly increase your available cash or your income, they demonstrate to your lender that you are willing to make sacrifices to keep your home.

9. Avoid foreclosure prevention companies. You don't need to pay fees for foreclosure prevention help. Use that money to pay on the mortgage instead. Many for-profit companies will contact you promising to negotiate with your lender. While these may be legitimate businesses, they will charge you a hefty fee (often two or three month's mortgage payment) for information and services your lender or a HUD approved housing counselor.

10. Don't lose your house to foreclosure recovery scams! If any firm claims they can stop your foreclosure immediately, and you sign a document appointing them to act on your behalf, you may well be signing over the title to your property and becoming a renter in your own home! Never sign a legal document without reading and understanding all the terms and getting professional advice from an attorney, a trusted real estate professional, or a HUD approved housing counselor.

If you are having trouble making your mortgage payments, act now. Here are some phone numbers that can help those facing a foreclosure:

- Foreclosure Counseling Hotline** – (888) 995- HOPE
- DuPage Homeownership Center** - (630) 260-2500
- Natl. Assoc. of Foreclosure Prevention Professionals** – (800) 989-9329
- Dept. of Housing & Urban Dev.** - (800) 569-4287 or TTY (800) 877-8339.

Glenbard North Senior Awarded Comcast Scholarship

Ms. Megan Ney, a recent graduate of Glenbard North H.S. was awarded a 2009 Leaders & Achievers Scholarship by Comcast at a luncheon this past May at Dominican University also attended by Trustee Rick Gieser. Comcast Leaders & Achievers Scholarship program recognizes graduating high school seniors for their community service, academic achievement, positive attitude, and demonstrated leadership abilities. During her 4 years at Glenbard North H.S., Megan achieved a 4.8 GPA while excelling as a member of the varsity Cross Country, Track & Field and Basketball teams. Megan has also given much of her time as a volunteer at her church, as a member of the Make a Difference Day food drive, a school-sponsored food and clothing drive for victims of the Katrina disaster, as a member of the District 87 referendum student committee, and as a charity runner for the Bud Swanson 5K Run for Sarcoma.

Megan will attend Elmhurst College this fall and compete on the varsity Bluejay's basketball team.

PACE News

Feeder Route 711 Enhanced

PACE Suburban Bus Agency Board has approved a series of route improvements that includes an extension to the Schmale Road Feeder Route 711 along Army Trail Rd, Rohwling Rd. and Lake Street to the Addison Town Center. With this enhancement Route 711 will run later and more frequently. Feeder Route 711 runs from Roosevelt Rd. (State Rt. 38) in Wheaton north along Main St./Schmale Rd., to northbound Gary Ave., continuing to Stratford Square Mall in Bloomingdale and then eastbound along Army Trail Rd. ending at the Addison Town Center.

Pace RideShare (www.pacerideshare.com)

This free, easy and convenient service that connects commuters throughout the Chicagoland area interested in sharing their drive to work. The program gives residents and employees in Northeastern Illinois the ability to identify potential carpool partners quickly and securely. Contact possible carpoolers by e-mail to discuss what your needs and expectations are and you're on your way!

Register today to have access to a list of people who live and work near you and have similar schedules and personal preferences. By carpooling you help preserve air quality, decrease traffic congestion, conserve fuel and promote better health.

In addition to ride matching capabilities, the website also has a pollution calculator where you track your pollution impact whether you drive by yourself, carpool, take transit or bike to work. This website is a great tool for Clean Air Counts businesses and employees. Please consider distributing information about this website to employees.

For questions about this website, carpools and vanpools, please contact Kristian Skogsbakken at 847-228-4280 or kristian.skogsbakken@pacebus.com. To learn more about Tax Free Transit, contact the RTA/CTA Transit Benefit Program at 1-800-531-2828.

Registered Seniors Ride Free

Area residents aged 65 and over are eligible to ride free on Pace fixed route service if they have registered for the RTA Reduced Fare Permit. Those already registered for the RTA Reduced Fare Permit will be automatically transitioned to the free ride program. To get a free ride, seniors must possess the Reduced Fare Permit. The registration process can take up to four weeks, so contact the RTA at 836-7000 for more information, or visit www.rtachicago.com/seniorsridefree/ without delay.

What Illinois Residents Need to Know About the Illinois Organ & Tissue Donor Program

Did you know?

There are more than **4,700** Illinois residents and **98,000** people nationwide that are awaiting lifesaving transplants.

What can you do?

The answer is simple; register as an organ/tissue donor! On January 1, 2006, Illinois passed a law creating a donor consent registry that eliminates the need for additional consent from family members or loved ones for you to be an organ/tissue donor when you pass away. The Illinois Secretary of State's donor consent registry will ultimately save many more lives, but to ensure your wishes as a donor are honored, you must have **Registered or re-registered after Jan. 1, 2006.**

How do I register?

The easiest and fastest way you can register is online at www.DonateLifeIllinois.org. Donate Life Illinois has made it easy for you to do so with a 30-second online process at. You just need your state ID or driver's license number and must be at least 18.

You can also fill out an Illinois Organ/Tissue Donor Registry registration card, call the Illinois Secretary of State Organ/Tissue Donor Program at 800/210-2106 or stop by any Illinois driver's license facility.

If you have questions about organ, tissue, eye and blood donation or are still unsure about registering as an organ donor, please visit www.DonateLifeIllinois.org and click on "Partners," or contact Donate Life Illinois at 888/307-DON8 (3668).

As a resident of Carol Stream and a mother of a child who has undergone a liver transplant, I highly encourage you to consider being an organ/tissue donor. It not only saves lives, but families—a mom, a dad, a brother, a sister, etc. I cannot imagine what our family would be like without our son, Dylan.

Melissa Walsh

Fighting Telemarketing Fraud

Many phone sales pitches are made on behalf of legitimate organizations offering genuine products and services. Unfortunately, scammers also use the telephone to commit fraud. That's why the Federal Trade Commission (FTC) encourages you to be skeptical when you hear a phone solicitation and to report it if you think the call may be fraudulent. Anyone with a phone can be victimized by telemarketing scam artists. That's why every sales call you get by phone is an opportunity for a gut check: If the answers to the following questions give you any doubt about the caller's intentions or methods, end the call.

Who's calling -and why? Telemarketers must tell you it's a sales call, the name of the seller and what they're selling before they make their pitch. If they don't give you the required information, say "no thanks," and get off the phone.

What's their hurry? Fast talkers who use high pressure tactics could be hiding something. Take your time. Most legitimate businesses will give you time and written information about an offer before asking you to commit to a purchase.

If it's free, why are they asking me to pay? Question charges you need to pay to redeem a prize or gift. Free is free. If you have to pay, it's a purchase – not a prize or a gift.

Why am I "confirming" my account information – or giving it out at all? Some callers have your billing information before they call you. They're trying to get you to say "okay" so they can claim you approved the charge.

What time is it? The law allows telemarketers to call only between 8 am and 9 pm. A seller calling earlier or later is flouting the law. Report them to the Federal Trade Commission.

Do I want more calls like this one? If you don't want a business to call you again, say so. If they call back once you've asked them not to, they're breaking the law. Report them to the Federal Trade Commission.

Isn't there a National Do Not Call Registry? Yes, and putting your number on the Registry will stop most telemarketing calls – but not all. You still will get calls from businesses with which you do business, unless you tell them to stop calling you, too. But calls from sales people from unfamiliar businesses may be the sign of a scam.

Reporting Phone Fraud

Your complaint counts! Report telephone scam artists to the FTC Consumer Fraud Hotline @ **(877) FTC-HELP** as well as to the **Illinois Attorney General's Office @ (800) 386-5438**. When you report fraud to the FTC, your complaint is entered into a secure database that is available to hundreds of civil and criminal law enforcement agencies in the U.S. and abroad. By reporting telemarketing fraud, you are providing important information to help law enforcement officials track down scam artists and stop them. When you report telemarketing fraud, your information may help local and federal law enforcers investigate the scammers. Provide the telemarketer's name or phone number, as well as the date and time of the call.

Filling Up for Less

Worried about the high cost of gas? Here's some easy ways to save money at the pump—and make a difference for the planet too:

1. Check your tire pressure frequently and keep your tires fully inflated. Full tires can improve your fuel economy up to 10%.
2. Use a GPS - studies show that using a navigational device can reduce miles traveled up to 16%.
3. If you own a car but do not require it for your daily commute, sell the car and join a car sharing company instead. This cuts down on your insurance, gas, and car payment bills, and significantly cuts down on casual, unnecessary driving.
4. Find out your car's optimal speed for fuel economy and set your cruise control when traveling on federal interstates or on state routes.
5. Choose an efficient route for your errand-running so as to avoid multiple trips or excessive miles. If you visit a shopping center and plan to make multiple stops, park your car in the center of the parking lot and walk to your individual destinations
6. Roughly 44% of car trips taken are less than 2 miles - burn calories instead of gasoline by taking a walk or riding a bike.
7. Ask your boss if you can telecommute one or two days per week.
8. Carpool with co-workers. This can be fun and a great way to wake you up in the morning! If a daily carpool won't work, try one or two days per week.
9. If you have two cars and are taking a trip, choose the more fuel efficient car.
10. Shop online instead of making the trip!
11. Keep your car tuned up.
12. If your vehicle is a manual transmission, save gasoline by downshifting instead of braking in neutral.
13. Don't drive with the windows down at high-speeds. This creates drag and reduces your fuel economy.
14. Support public transportation in your area! Increased use and demand for public transportation can improve the level of service.
15. Do not drive aggressively as it waste gas and lowers gas mileage by 33% on highways and 7-10% in the city.

Welcome New Businesses

The Village welcomes its new businesses and thanks them for choosing Carol Stream as their home base of operation. The Village and the local Chamber hope your business thrives in our community through hard work, innovation and community involvement. The Village encourages all its residents to keep sales tax dollars in the Village by shopping at these and our other local business establishments.

Plan Before Disaster Strikes

If there is a fire in your home or apartment, everyone in your family should have a choice of 2 exits and have a pre-determined meeting place once outside. When fire breaks out...seconds count and therefore having a plan is vital.

In a large scale emergency, what will you do if a disaster affects not only you...but the entire community? No matter the type of disaster, you and your loved ones should ask:

- Your family get separated...how will you contact each other?
- Basic services like water, electric, or telephone are interrupted for several days?
- Stores are closed and you cannot buy food?
- You need to evacuate the area quickly, without notice?

The Federal Emergency Management Agency (FEMA) suggests that everyone develops an emergency plan and be self-sufficient for up to 72 hours after disaster strikes. www.Ready.gov provides a vast amount of information including:

- Developing a family emergency plan • Assembling an emergency supply kit •
- How to respond in various emergency situations • Understanding severe weather •

Download the **Readiness Survey** to determine your 'readiness quotient' @ www.whatsyour-rq.org. Visit Ready.gov and start preparing your family.

Latex Paint Recycling Drop Off

Residents can drop off unwanted latex paint during the 2008 summer collections. Usable latex paint will be filtered and rebled into a variety of colors, types, and finishes. Residents, businesses, schools, churches, and community groups can obtain five gallon buckets of the quality-recycled paint for free during the week. The facility is the DuPage County Wastewater Treatment in Woodridge at 7900 S. Route 53. Hours are:

Monday - Friday from 8:00 a.m. to 2:00 p.m.

(July 2nd - August 15th, excluding holidays)

Selected Saturdays from 8:00 a.m. to 2:00 p.m.

(July 12th, July 26th & August 9th)

For more information, contact the DuPage County Public Works at (630) 985-7400.

Carol Stream Local Job Board

The jobs listed below are provided as a service to the residents and businesses in the Village. Please contact the business directly to inquire about a listed job(s).

Job	Business	Contact	Address	Phone/Fax	Wage	Date
2nd Shift Warehouse Worker	Lagasse, Inc.	Chris Morrell	230 E. Lies Road	(630) 871-3042	\$10.75-\$11.00/hr. after 90 days	5/14
Package Handler/PT	FedEx Ground	Monica V.	205 Della Court	(630) 9165516	\$9.50-\$10.00/hr.	5/13
Shipping/Order Filling PT & FT	United Stationers Supply Co.	Michelle Alcala	810 Kimberly Drive	(630) 690-1400 fax 6902866	\$10.50/hr.	5/13
Technician/Prepper	Rhino Linings of DuPage	Judy / Bonnie	205 E. Kehoe Boulevard, Unit 7	(630) 653-4656	\$10.00/hr.	4/14

In a continuing effort to assist registered Carol Stream businesses in identifying candidates for open employment positions, the Village will use its media resources (Public Access Channel 6, our website and the Correspondent newsletter) to help advertise the available jobs. To post a job opening, complete the form below. For questions concerning the job posting service please call Dawn Moser, Employee Relations Dept. at 871-6242 or email dmoser@carolstream.org.

50th Anniversary Logo Design Competition

The Village seeks logo design entries from local Carol Stream artists to help us brand the community's 50th anniversary celebration that officially begins Jan. 5, 2009. The contest is also open to Carol Stream residents, freelance graphic/visual artists or those that work for a Carol Stream-based printing, graphics design, advertising, brand development or product promotion company. The Village will join with other local governments, the Chamber of Commerce and other civic agencies to celebrate our golden anniversary all year long. **The deadline for logo design entries is Friday September 26th.** The Village will judge the logo entries for creativity, originality, use of color, image clarity and consistency with the anniversary theme. All entries must incorporate the number 50 as well as 'Carol Stream' in its design. It is preferable for entries to be submitted in one of the following file formats:

- JPEG
 TIFF
 EPS
 SVG
 PDF

However, the Village will accept a scanned image of the logo design. Inkscape is a free Open Source cross-platform application that can be used through an on-line download from the following web link

<http://wiki.inkscape.org/wiki/index.php/Inkscape>

Applicants can submit more than one entry, however all digital entries must be sent in the original file to administration@carolstream.org. Please note, the designer of the winning entry will be required to submit a standard legal form declaring the design as specific property of the Village of Carol Stream intended for its official use only.

The winner of the logo competition will win bragging rights and have their award-winning logo design reproduced on all 50th anniversary materials and media to include official stationery, street banners, the Village web site, news releases and other anniversary memorabilia.

For more information, contact Christopher Oakley, Asst. to the Village Manager at coakley@carolstream.org or by phoning (630) 871-6250.

DuPage Organic Garden Club Hosts Yard Tours

On Sat., July 26th, residents and the general public is invited to visit 3 local residential homes for the purposes of meeting with the owners to discuss their successful efforts to landscape their property using native plantings. The yard tour schedule is as follows:

- 1 – 1:50 pm – Kamin Residence @ 1344 Yorkshire Lane
- 2 – 2:50 pm – Smith Residence @ 555 Chippewa Trail
- 3 – 3:50 pm – Collins Residence @ 914 Forest Lane

Shop Locally to Support the Christmas Sharing Program

The Village asks residents to use the coupon for Jewel and sign up for the eScrip Dominick's program. Both Jewel and Dominick's Finer Foods are teaming up to assist the Police Department Social Services Unit in raising funds for the 2008 Christmas Sharing program. This annual program is a local volunteer grassroots effort of residents, civic organizations and businesses that give their time, talent and donations of food, clothing, and new children's toys! Please use the Jewel Shop & Share Coupon below on the dates listed when shopping. Jewel will donate 5% of the total purchases, excluding tax, to this year's Christmas Sharing program. Dominick's Finer Foods is using a new program called eScrip. This new program does not involve using coupons when you shop. The eScrip program is designed to automatically earn contributions continually throughout the year from Dominick's each time you shop using your fresh value card! This method of donating is fast and easy!

Please encourage your friends, neighbors and fellow members of our community to use the coupon when shopping during the dates listed on the coupon. Thank you for your participation. Please call the Social Service Unit at (630) 871-6280 to sign up.
