Klein Creek Streambank Stabilization – Section I Thunderbird Trail to Kuhn Road

The Village of Carol Stream has contracted with the professional engineering firm of Engineering Resources and Associates, Inc. (ERA) to complete the final design for repairing the **erosion** along Klein Creek's stream banks between Thunderbird Trail and Kuhn Road. The design and construction is estimated to cost approximately \$3,200,000, but the project will be partially funded through a grant from the Illinois Environmental Protection Agency. This grant will reimburse the Village at 50% of costs up to \$1,000,000, or about 33% of our estimate.

“Erosion” – The wearing away of sand, soil, or rock by moving water or wind.

Our records indicate that your address is one of those properties that is immediately adjacent to Klein Creek – Section I. The Engineering Services Department has created a webpage to introduce residents to the project, as well as to provide project updates and general communication.

Due to the significant amount of coordination that will be required between the Village and the affected residents, this letter is only the start. We hope to establish whatever line(s) of communication works best for each resident. Until the next notice, please feel free to call Engineering Services at 630-871-6220 or email us at EngineeringServices@carolstream.org.
